Document Information

Title	**USER MANUAL for DATA ENTRY SOFTWARE (Quick Results Module) Computerization of 18th Livestock Census 2007**
Document ID	NIC-APHID-LC2008
Author(s)	Mrs. Shweta Malhotra, Programmer , NIC
Reviewer(s)	Dr.A.K.Choubey, Senior Technical Director, NIC
Team Name	NIC-APHID
Team Members	Mr.Sanjay Sharma, Mrs. Shweta Malhotra,
Project Mentors	Mr. M. Moni , Deputy Director General , NIC
Editor	Mr. Sanjay Sharma, Scientist "D, NIC
Type of Report	SDLC Document-Managerial
Software Used	MS Word/Office XP
Templates Used	IEEE,STD1063-1987
Style guide	NIC QMS Style Guide

Document Overview

This document constitutes a formal statement of the USER MANUAL for DATA ENTRY SOFTWARE (Household Module) Computerization of 18th Livestock Census 2007. This document meets the QMS requirements of NIC.

14. Data Entry Part – IV Fisheries Statistics – I and 2
15. Data Entry Part – V Village Profile
16. Data Transmission , Backup and Restore
17. Master Reports

1.0 Introduction

India has conducted 18 Livestock Census so far. NIC was associated in 17th Livestock Census to publish District wise data on the website of the Department of Animal Husbandry Dairying and Fisheries (http://dadf.gov.in). Major Guidelines for conducting that Census were also published.

This is first time the Government of India has decided to preserve the household information on Livestock Census in database form. The number of records thus generated will be as follows:

- Village level data on Infrastructure ~ 0.6 m records
- Village level data on AH & Poultry (Quick results) ~ 0.6 m records
- Household data for all the parameters enumerated ~ 140 m records

If somebody requires analyzing the development in AH sector based on the information generated on the past Censuses, it may not be possible to process the information using present day IT tolls such as Data Warehousing and Data Mining technologies.

2.0 Hardware and Software Requirements

From such a large database to extract village, Sub-district, District, State and National level information, it is necessary that a sufficiently stable database is chosen to enter the data. For this purpose we have chosen SQL Server 2000.

The software has been developed to work on client server configuration. Detailed data entry is to be carried out on the same infrastructure or at least district wise data entry .

2.1 Hardware requirement

Minimum Hardware requirement to enter the data is as follows:

a) One Server with Windows XP/ Windows 2000 server environment. – Minimum 1 GB RAM. Server (preferably 2GB RAM), Clients (preferably 1GBRAM)

b) Clients Windows XP/ Windows 2000 environment - Minimum 512 MB RAM. Number of clients will depend on the number of data entry operators engaged in the data entry work (128 MB X No of Clients)
c) LAN configured environment. Local LAN for simultaneous data entry through Clients & Server

2.2 Software requirement:

2.2.1 On Server side

1. SQL Server 2000

Note :- While installing SQL Server take care of following steps
1. Choose Local Account option
2. Mixed Mode Authentication with user name **sa** and password **sa**

2. Internet Information Server 5.1
(Control Panel ->IIS ->Help -> About)

3. Internet Explorer 7.0
(Internet Explorer -> Help ->About)

4. .NET framework 2.0

(To determine which versions of the .NET Framework are installed on a computer, follow these steps:

1. Search the Mscorlib.dll file
2. Right-click the Mscorlib.dll file, and then click **Properties**.
3. Click the **Version** tab, note the file version should be v2.0.50727
4. v2.0.50727 .NET Framework is available with CD and on http://dadf.gov.in

5. Screen Resolution 1024X768 (TFT Wide screen may differ)

(Internet Explorer ->View ->Text Size ->Medium)

The Software is rigorously tested on Win XP Professional with SP2 and with SP3 also.

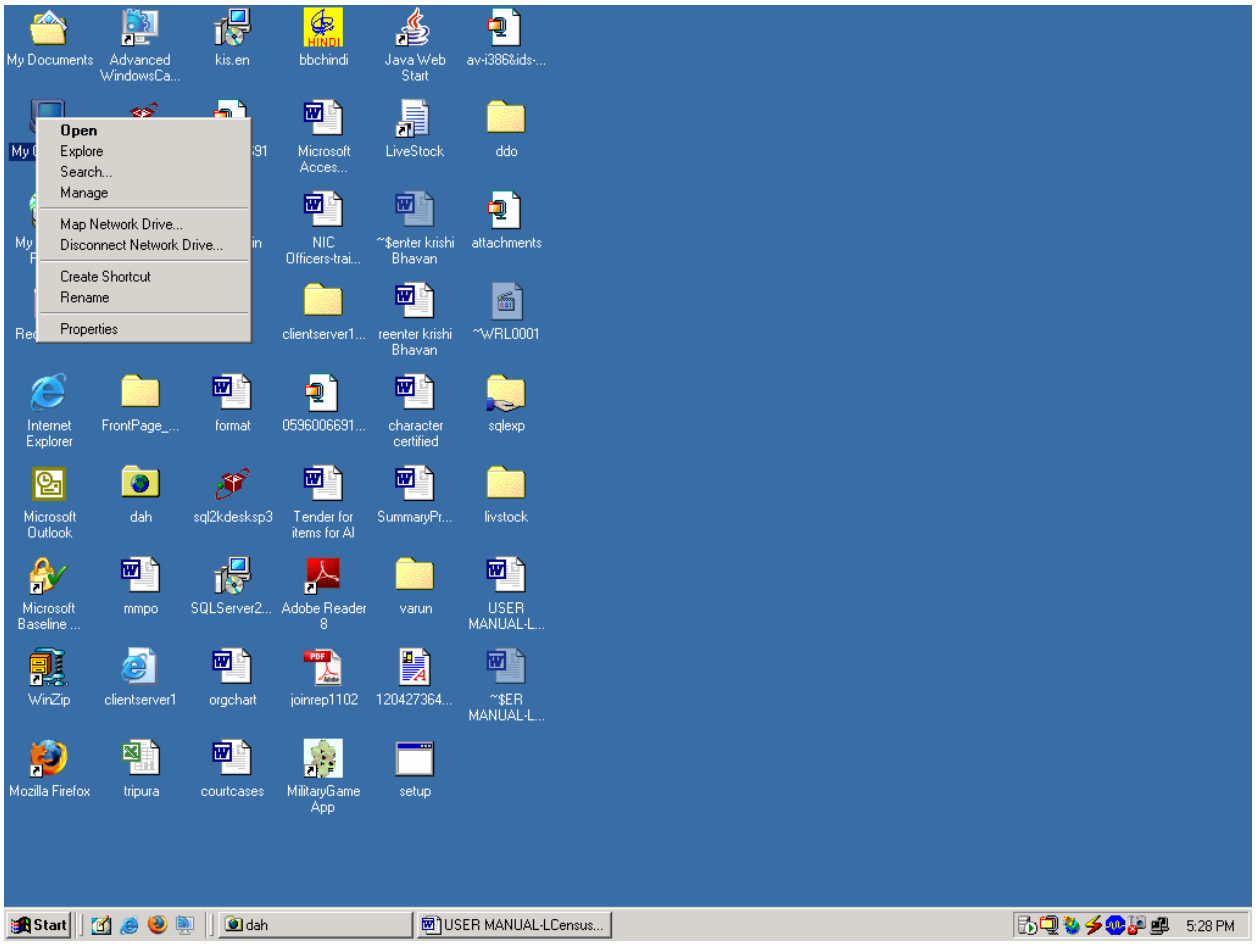
2.2.2 On Client Side

1. Internet Explorer 7.0

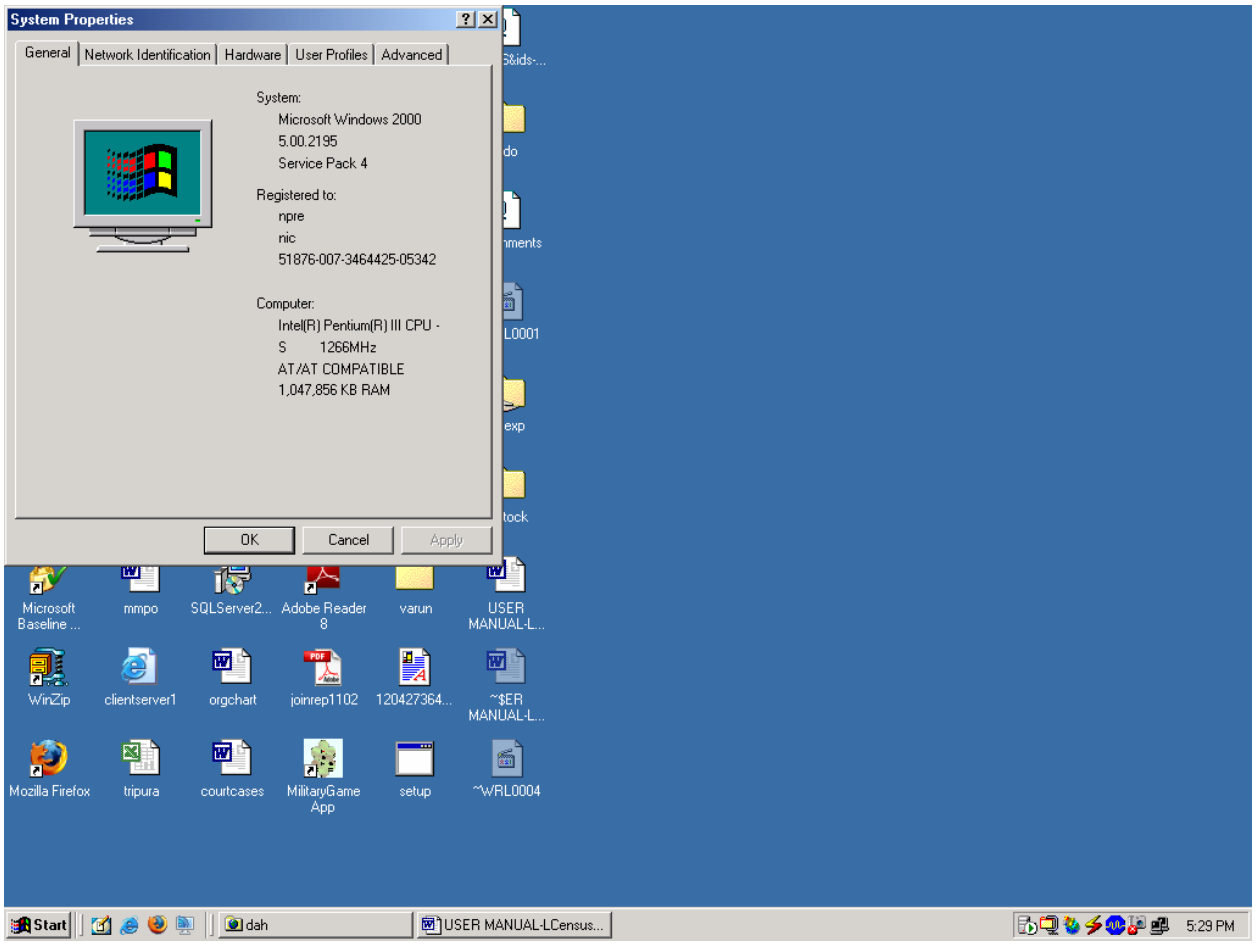
2. Screen Resolution 1024X768 (TFT Wide screen may differ)

3.0 Changing the name of Server

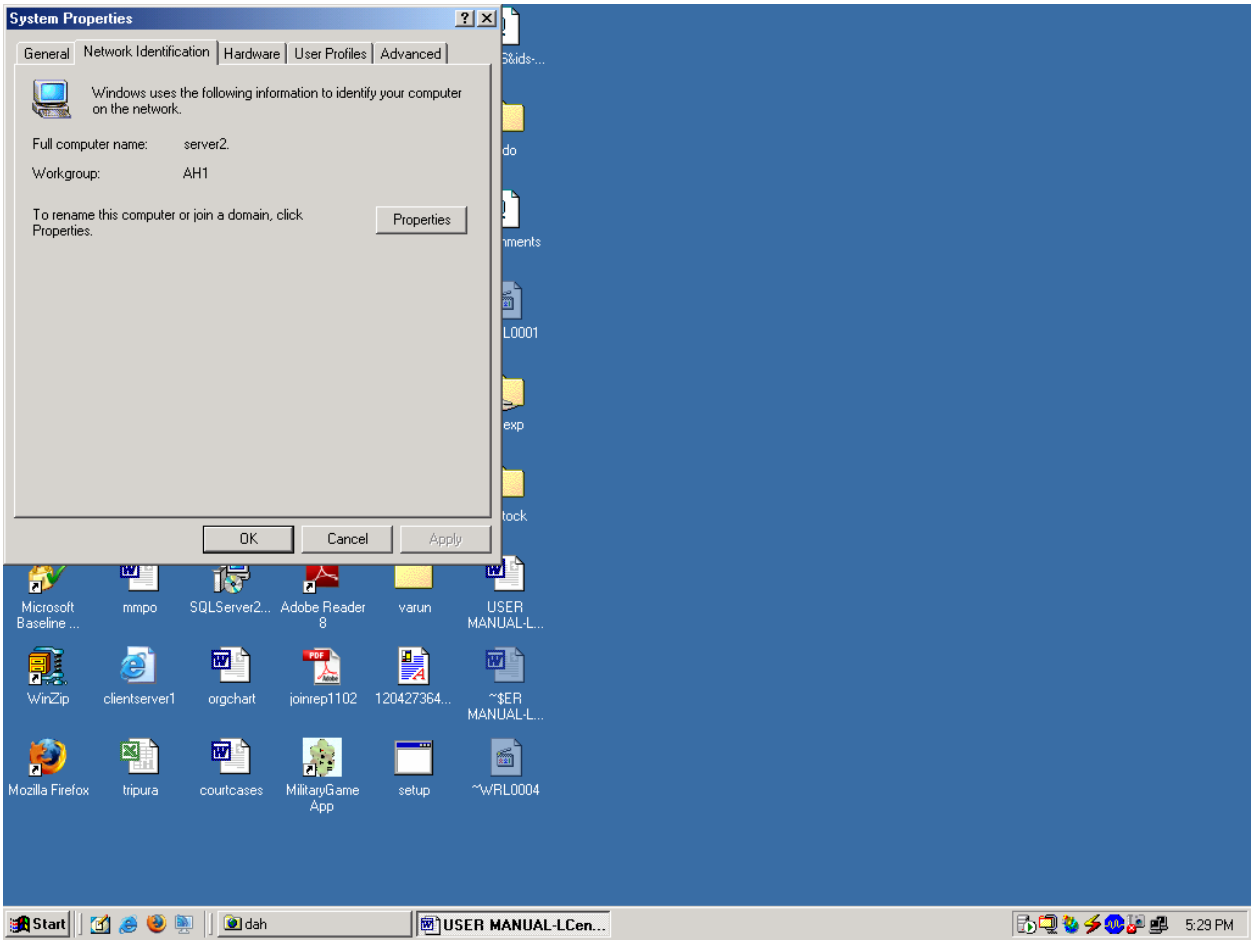
Right click on **My Computer** on Desktop



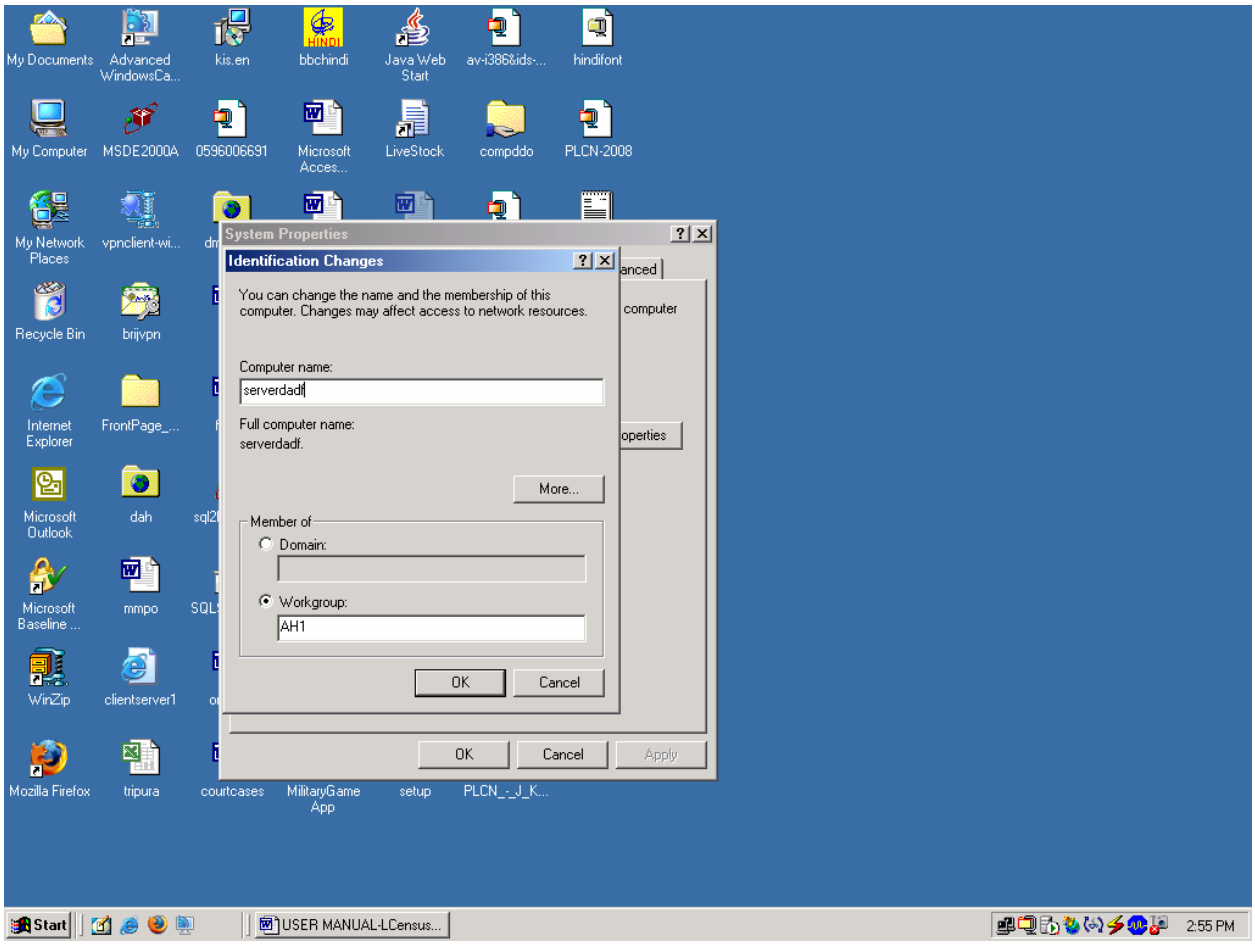
3.1 Click on **Properties**



3.2 Click on **Network Identification**, then click on **Properties**

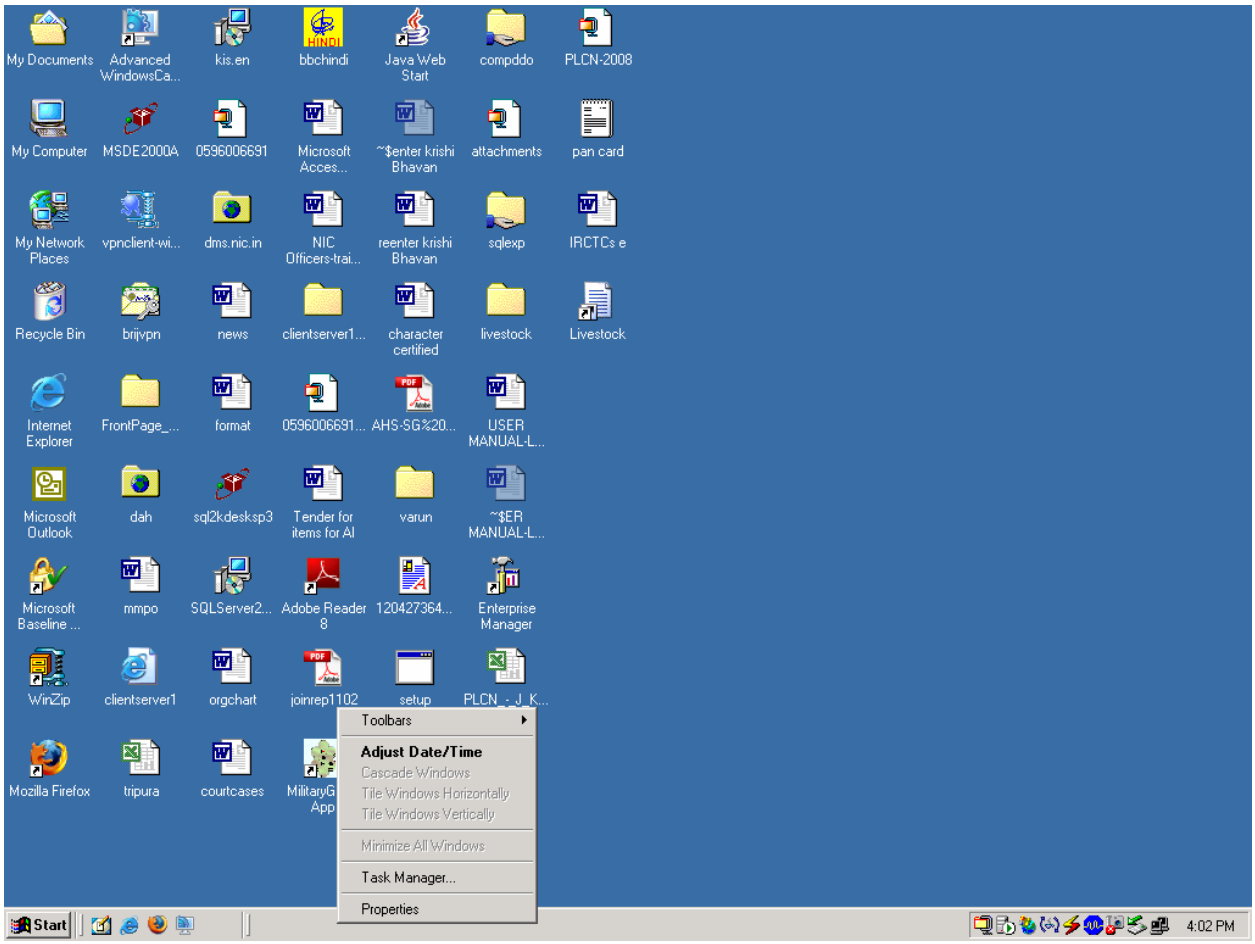


3.3 Change the computer name as **"serverdadf"** then click ok. (**Note**:- If your computer name is already "serverdadf" then no need to change the name of computer.)

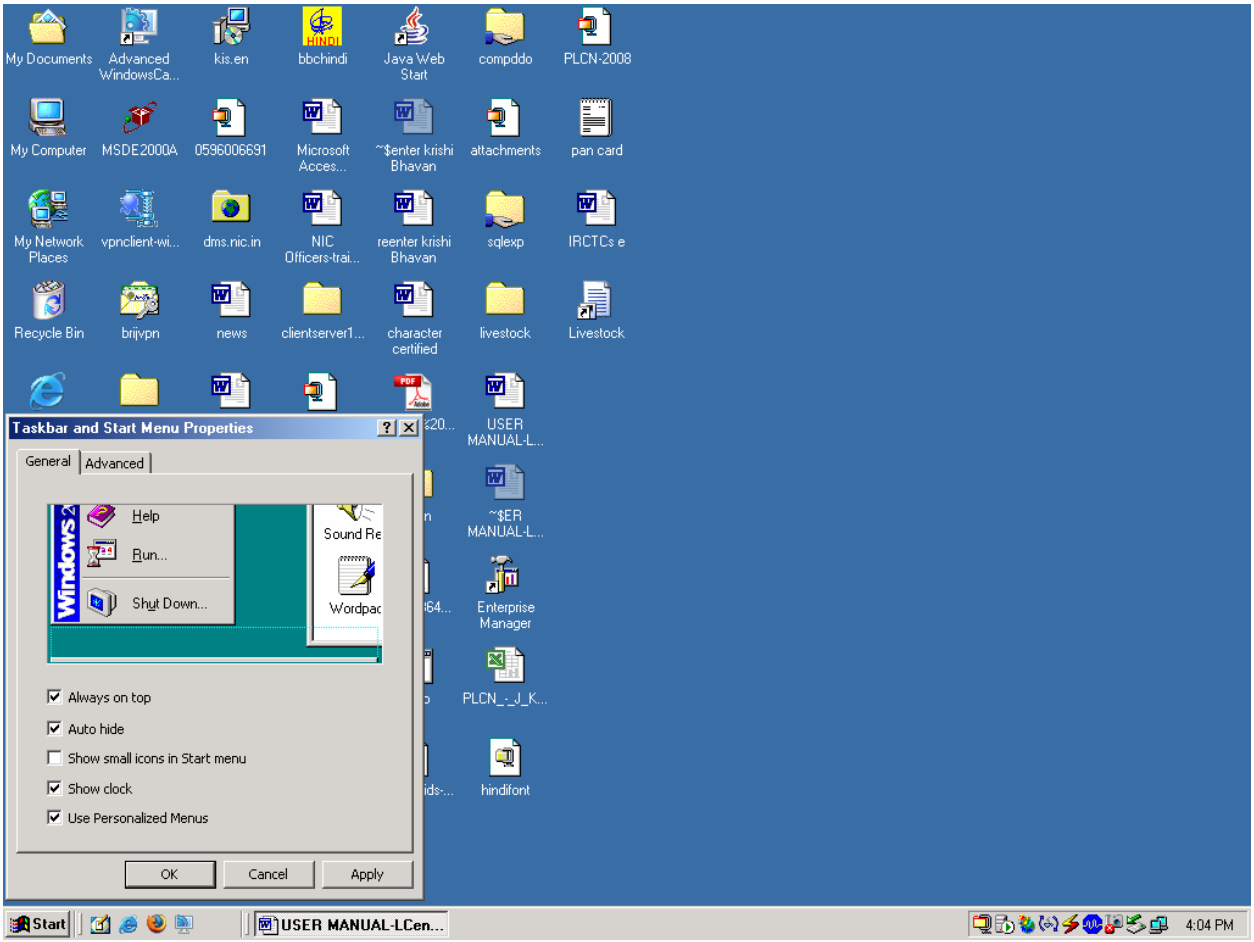


4.0 Enable **Auto Hide** to see lower portion of the screen

Click Taskbar as shown in the screen

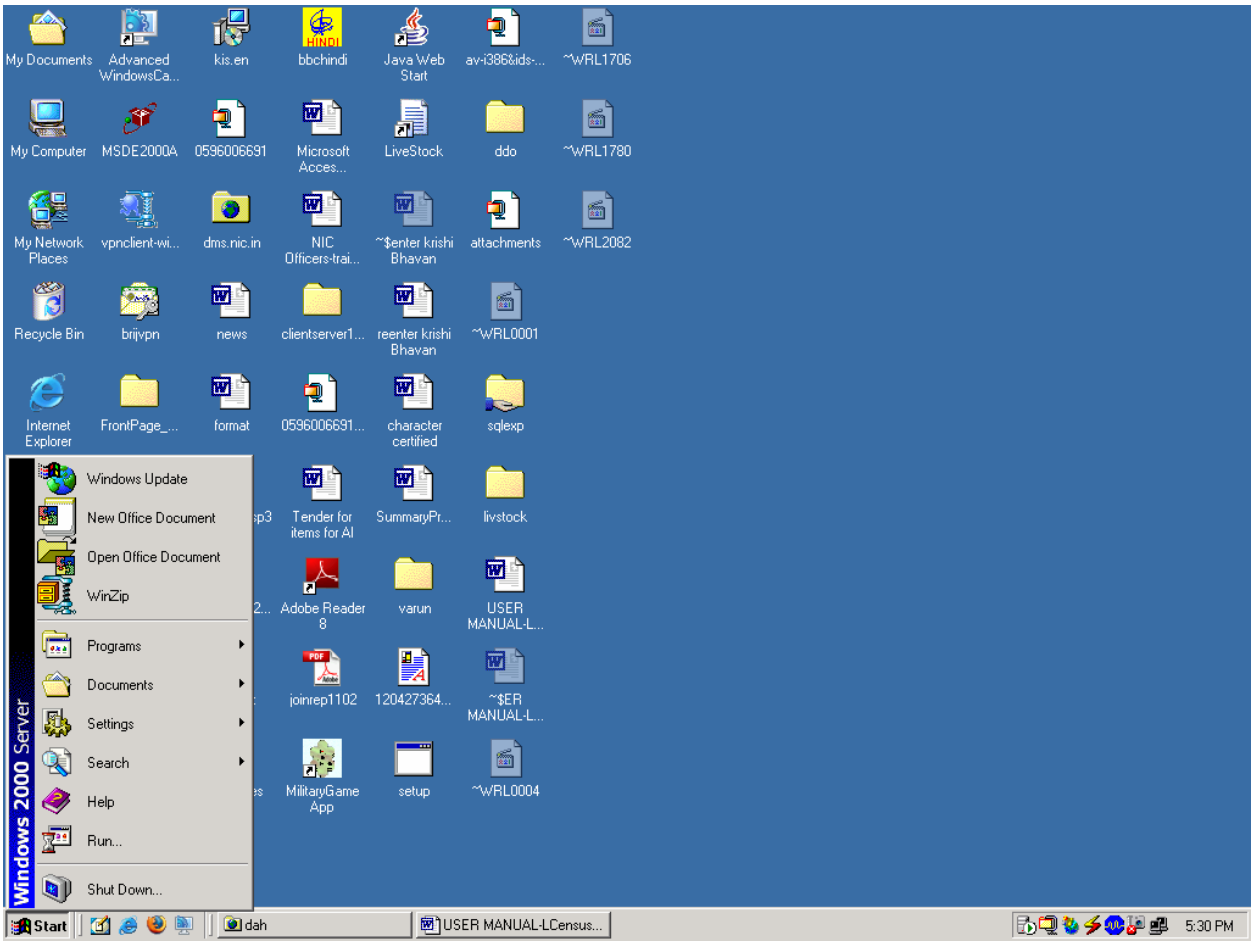


4.1 Now Click on **Properties**, then Click on **"Auto hide"** option , then click on **Ok**



5.0. To Install backup of database in SQL Server 2000

1. Click on **Start** button on left corner on the desktop.



Note :- Kindly take care of the following while installing backup

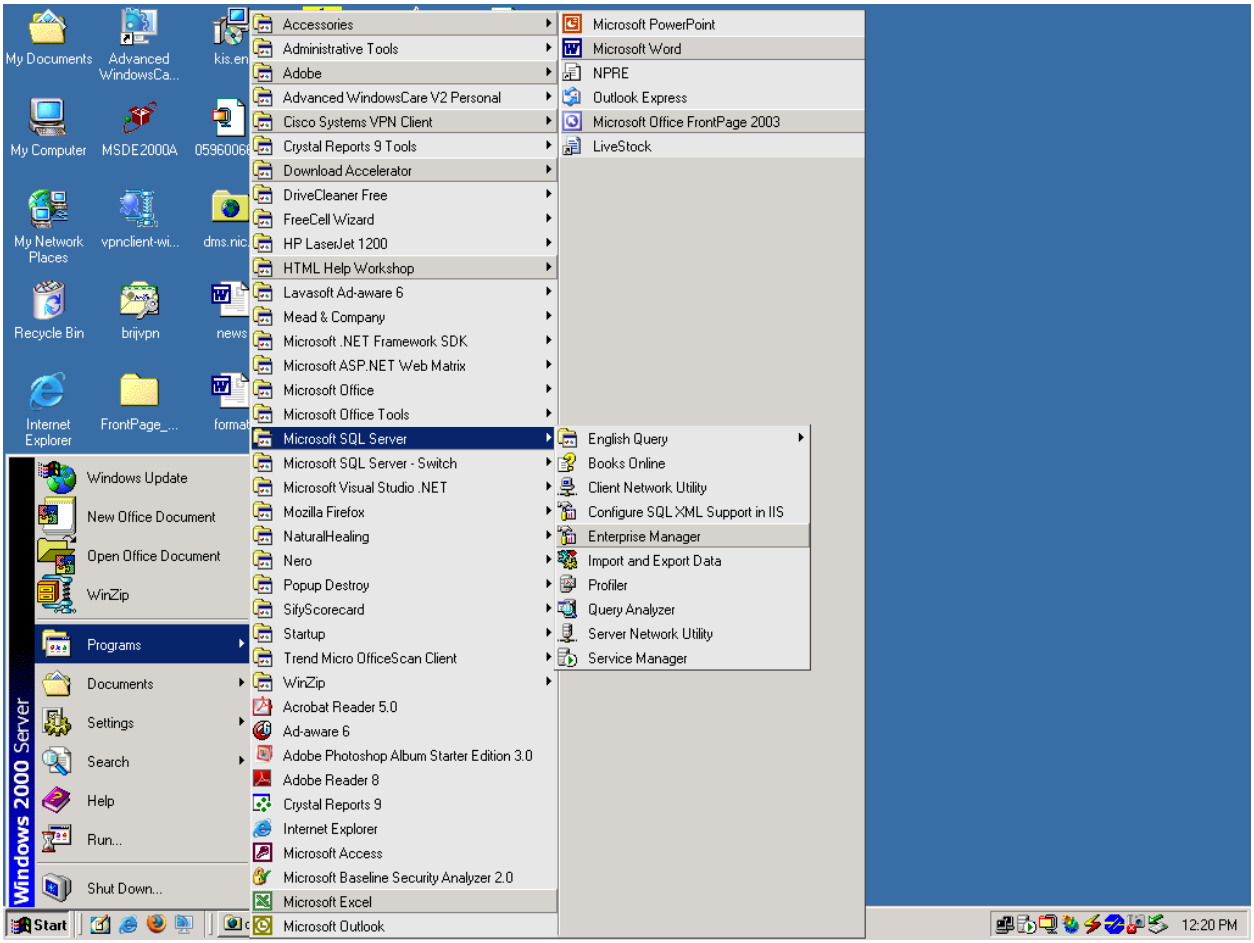
SQL Server 2000

1. Choose Local Account option
2. Mixed Mode Authentication with user name **sa** and password **sa**

Backup and Restore

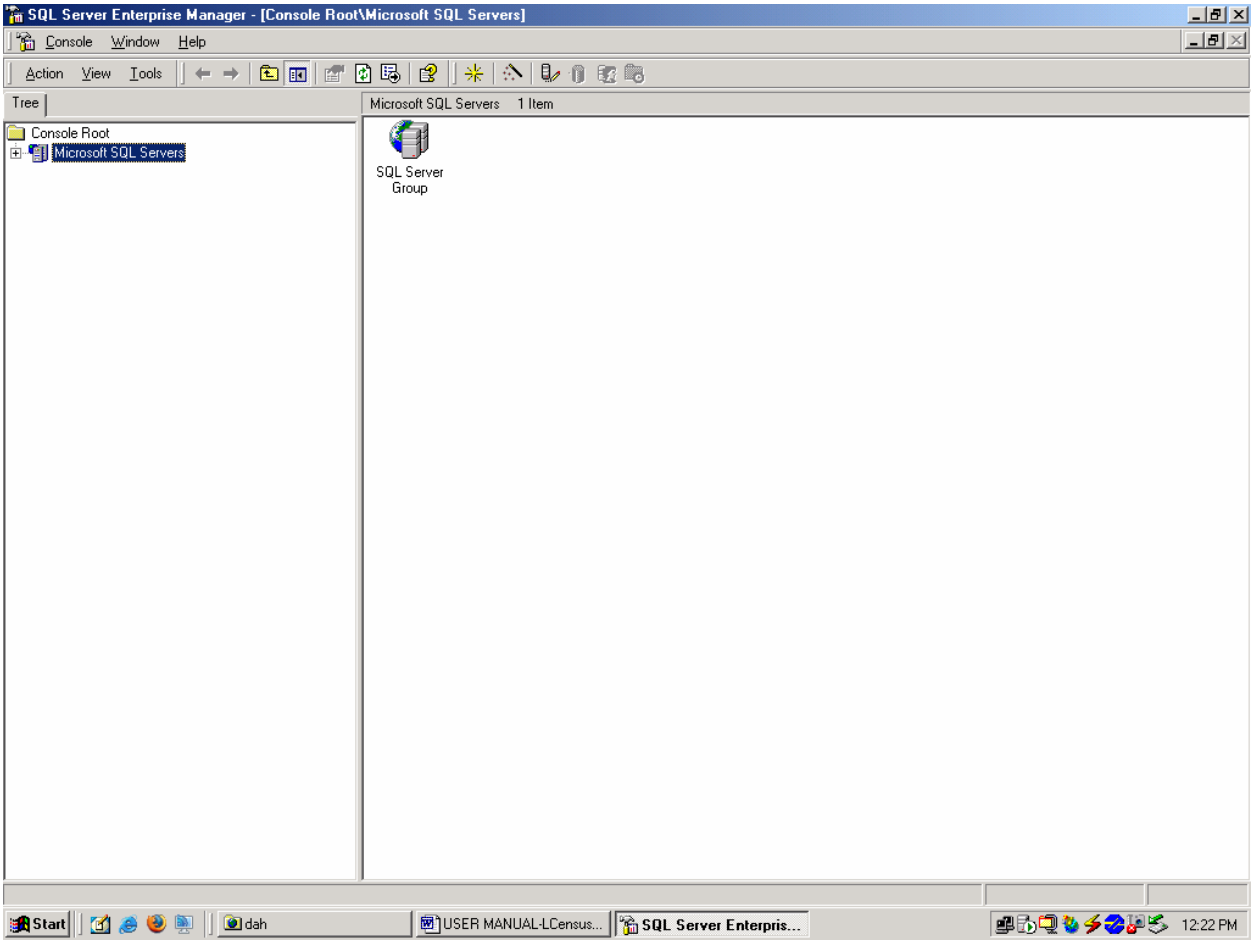
Backup is to be restored only one , data will be lost if installed second time on the same system. In Client / Server Architecture , Data will be saved at one place (serverdadf) automatically.

5.1 Click on Programs **Microsoft SQL Server** and then click on **Enterprise Manager** as shown in the screen below

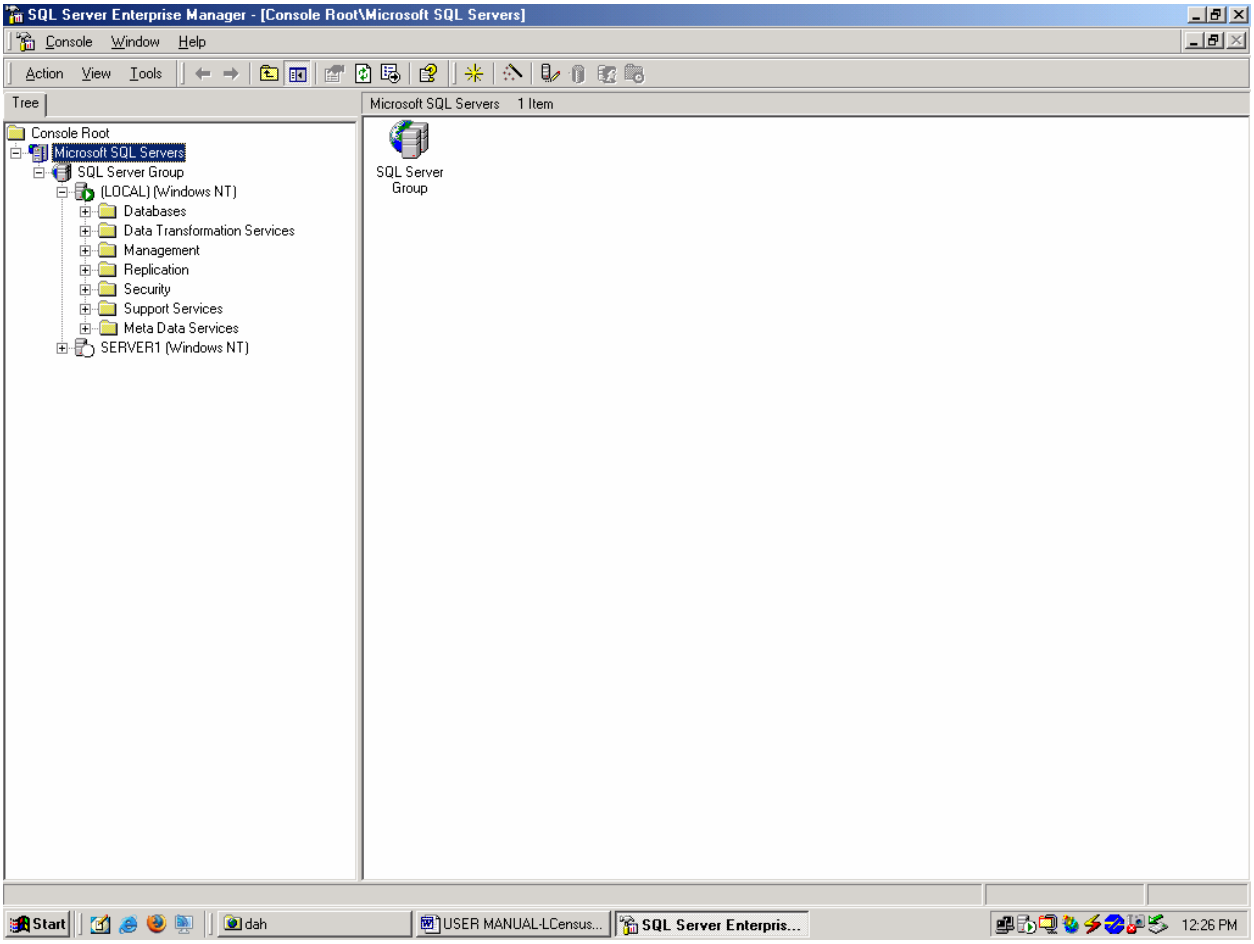


Note :- A detailed guidelines is also provided in Manuals and Instructions Directory namely “

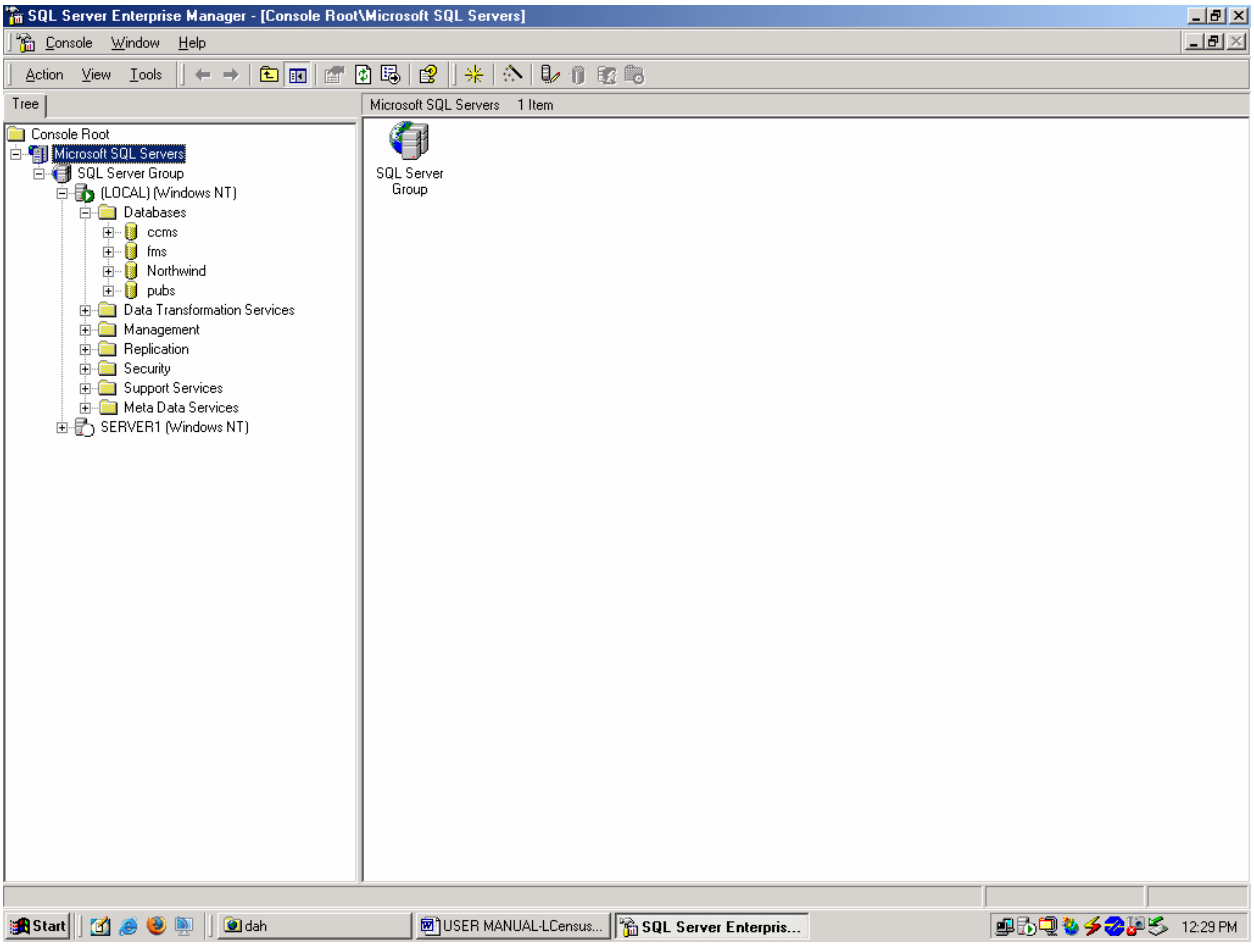
5.2 After clicking on **Enterprise Manager** the following screen will appear



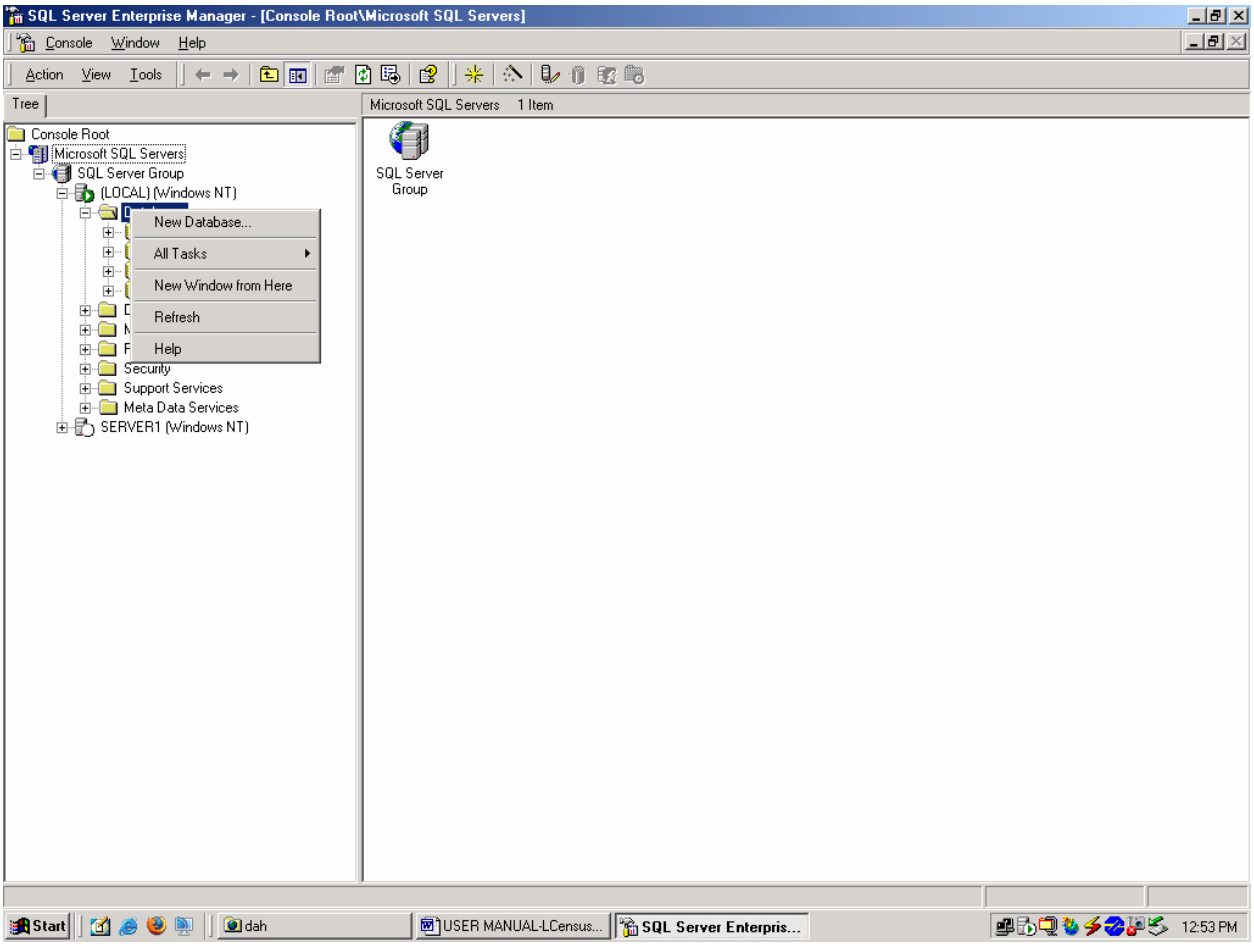
5.3 Click on **"+"** symbol of Microsoft SQL Server then on **SQL Server Group** and then click on **Local** the following screen will appear



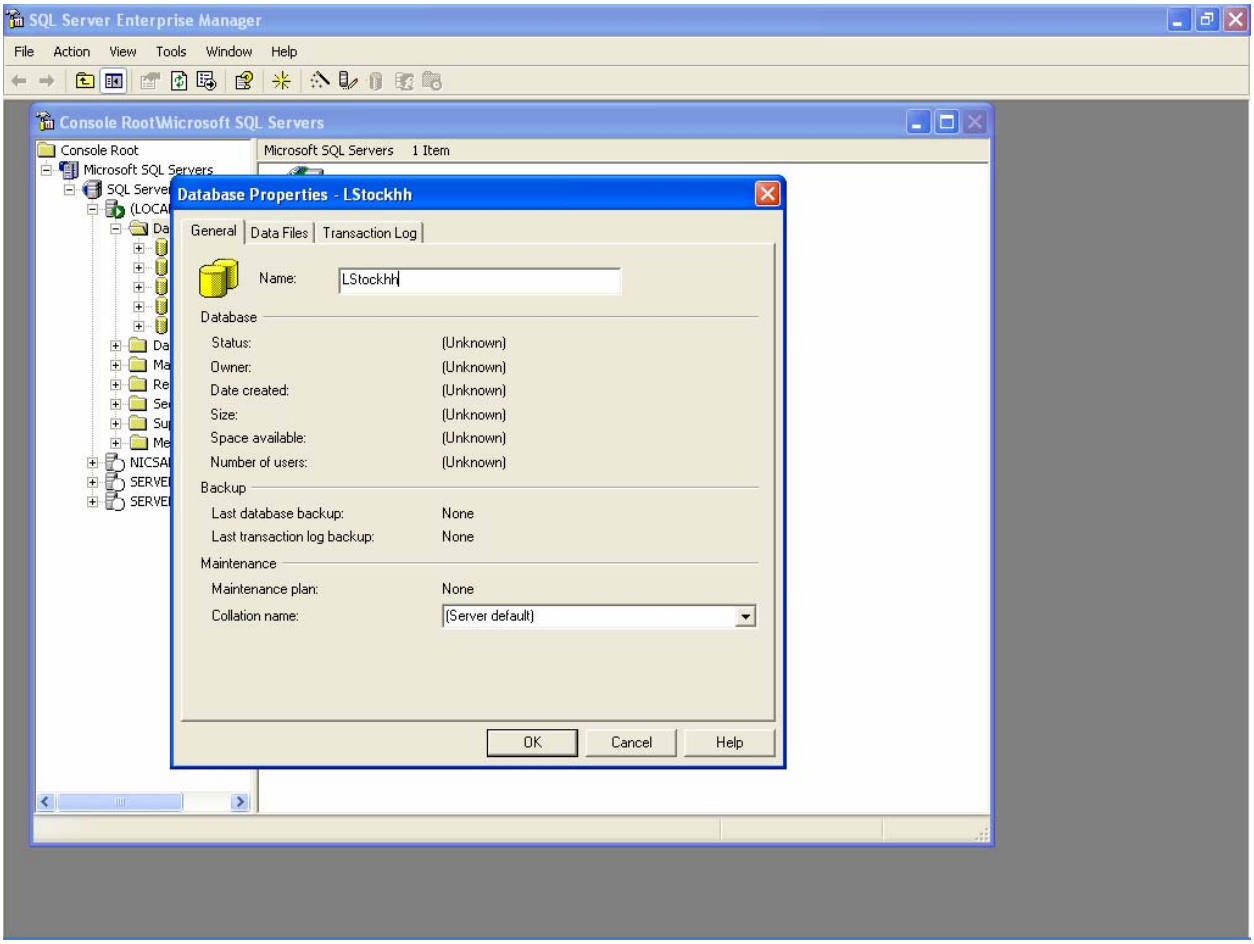
5.4 Then Click on **databases** icon



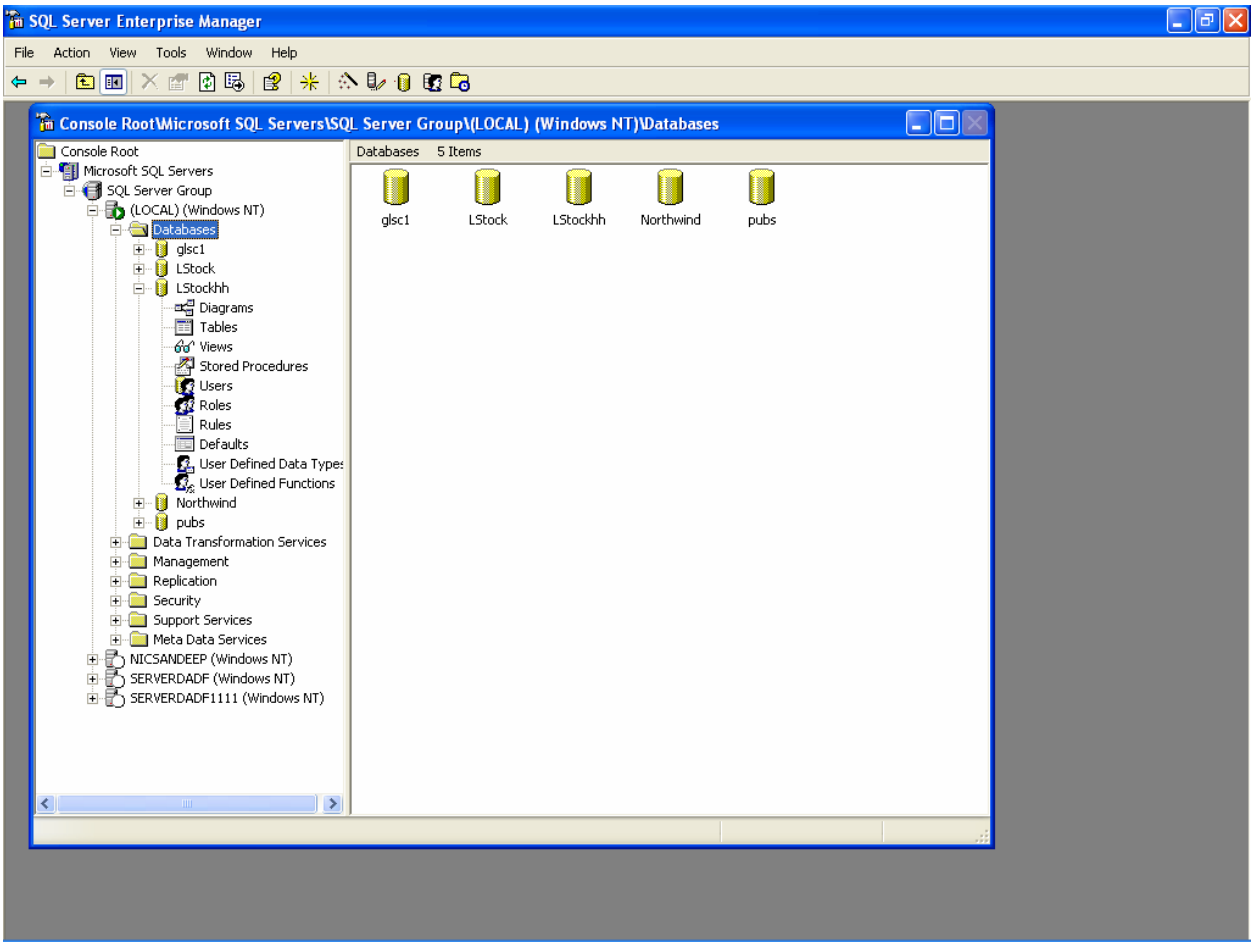
5.5 Now right click on **Database** icon and then click on **"New Database"**



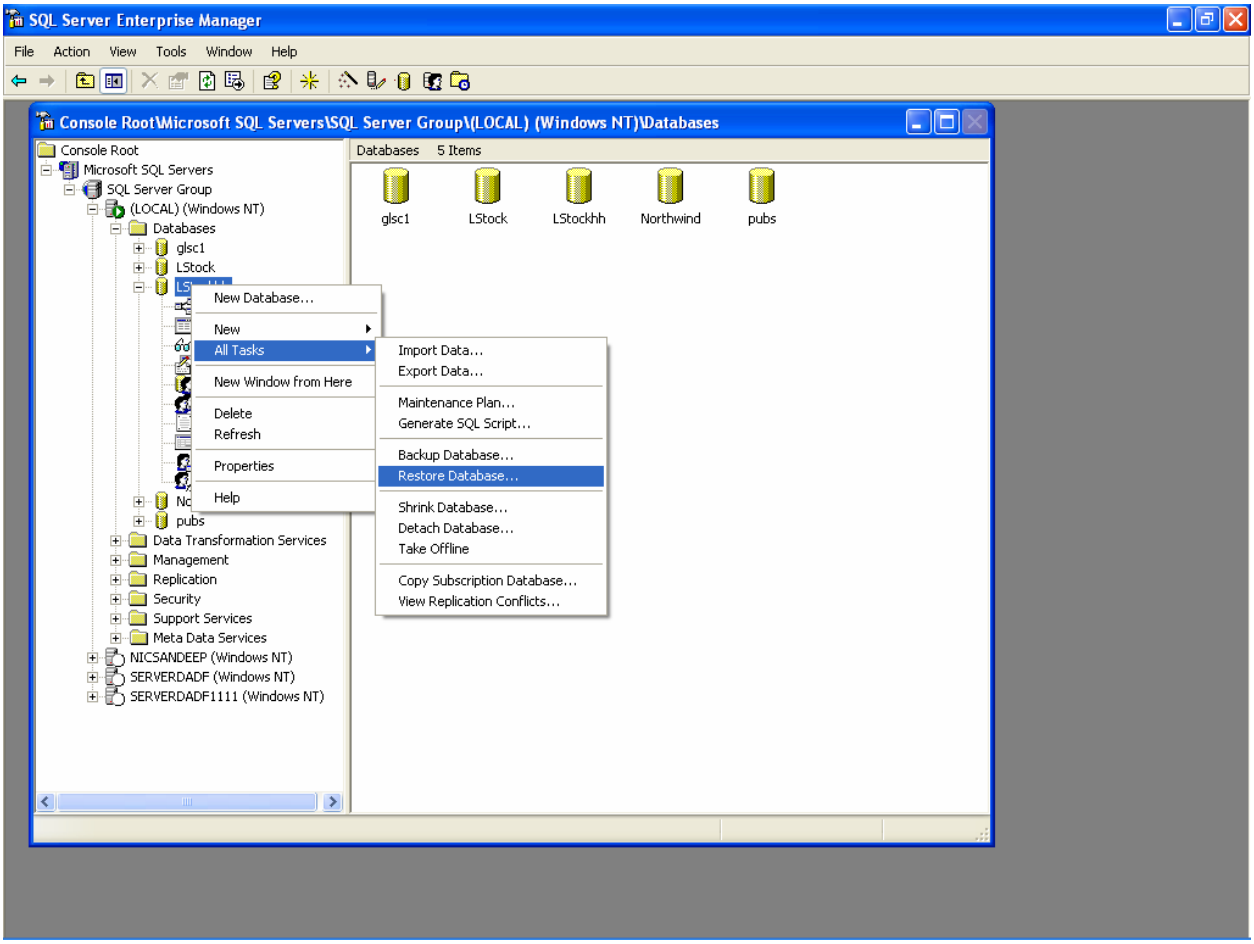
5.6 After clicking on new database the following screen will appear, type **"LStockhh"** in **Name** and then click **OK**



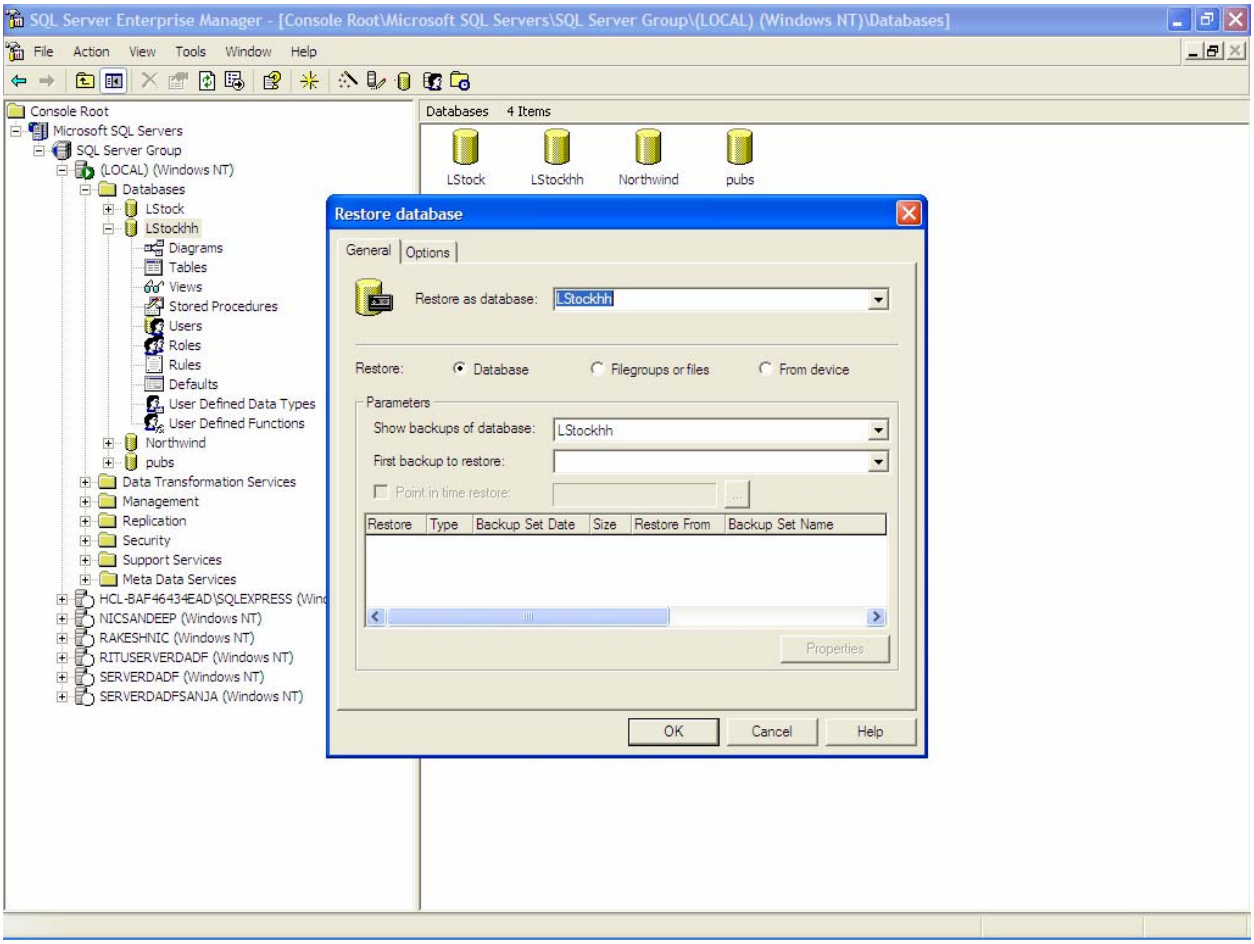
5.7 The "**LStockhh**" database will be created as shown below



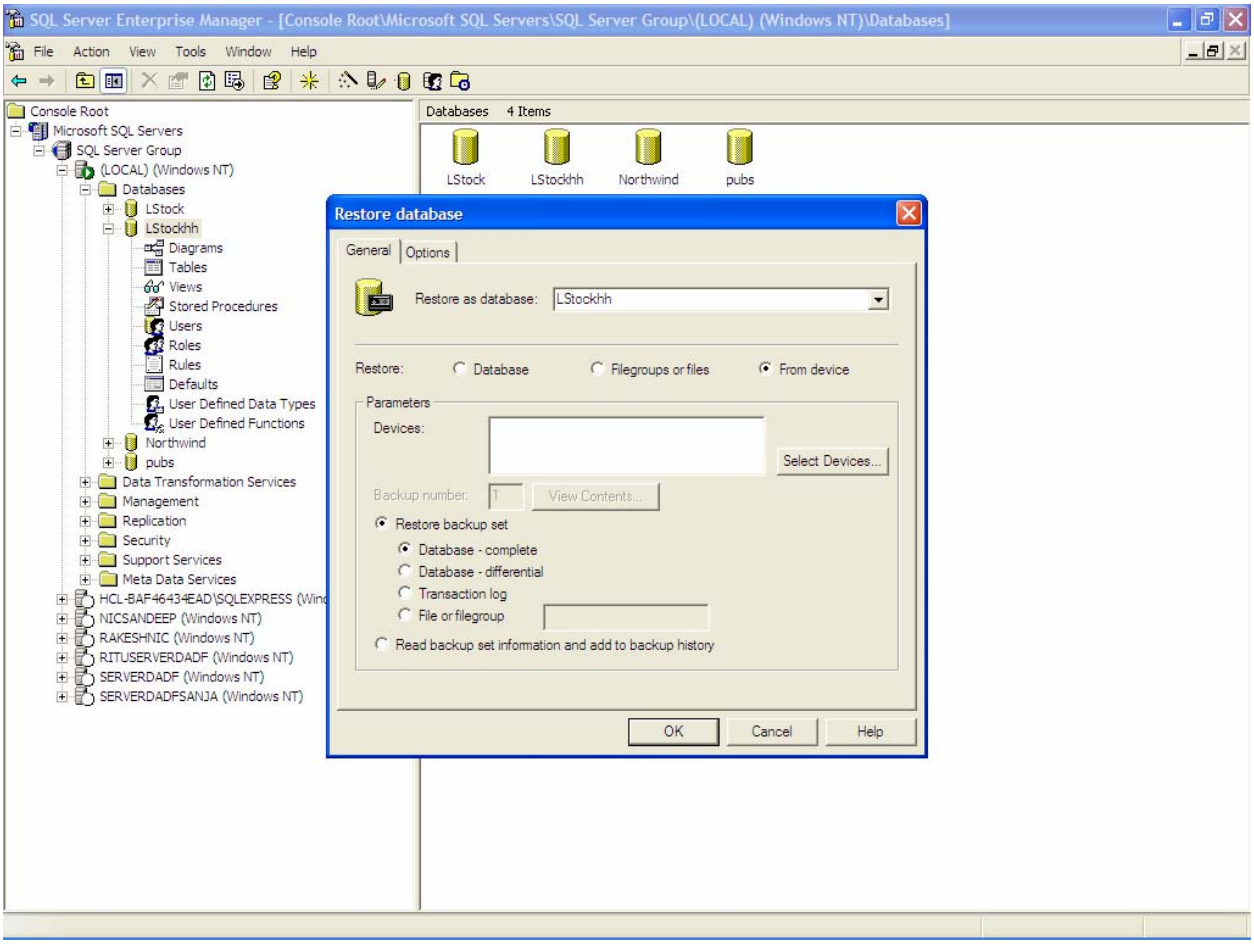
5.8 Now right click on **"LStockhh"** , then click on **All Tasks** option, after that click on **Restore Database** option



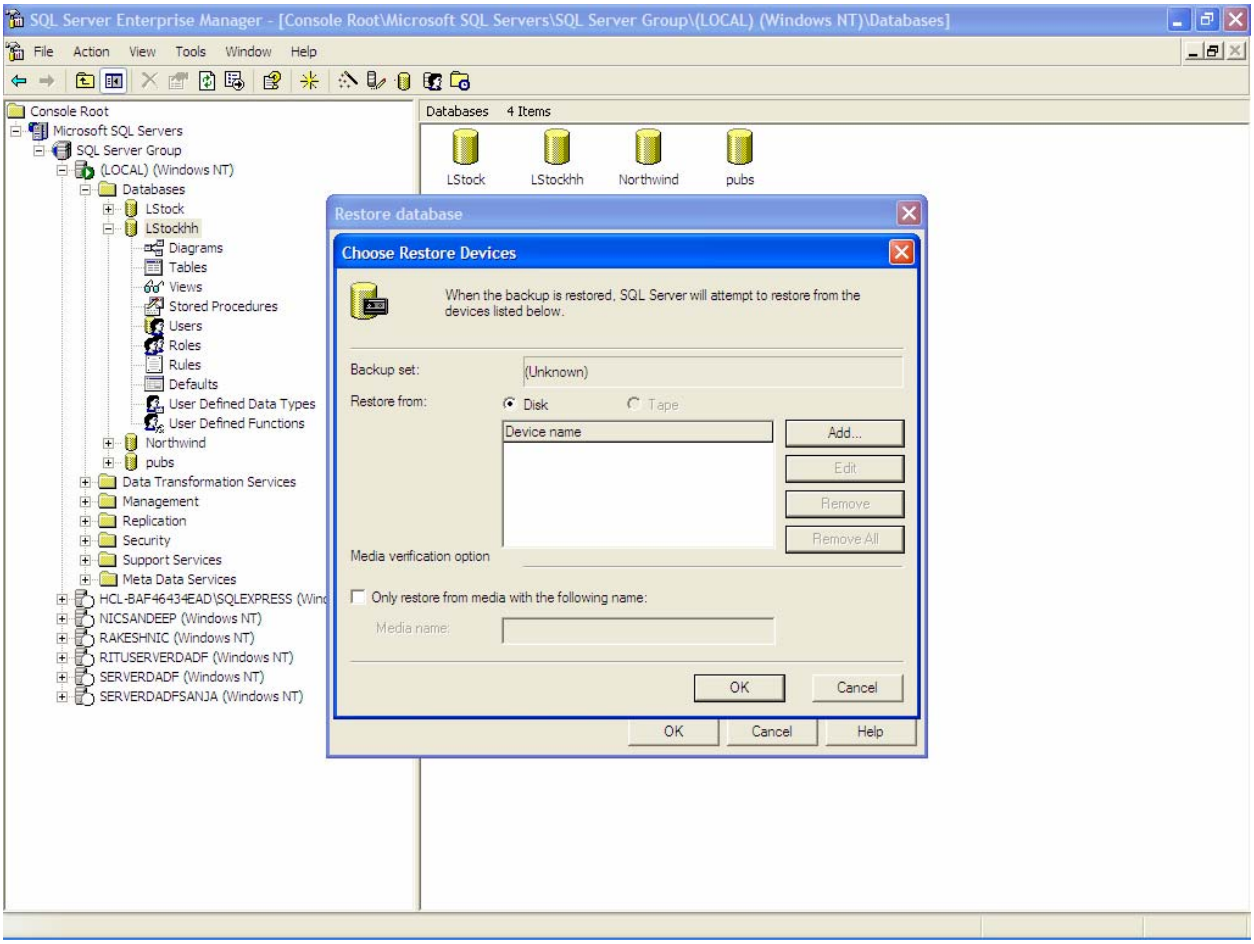
5.9 The following screen will appear



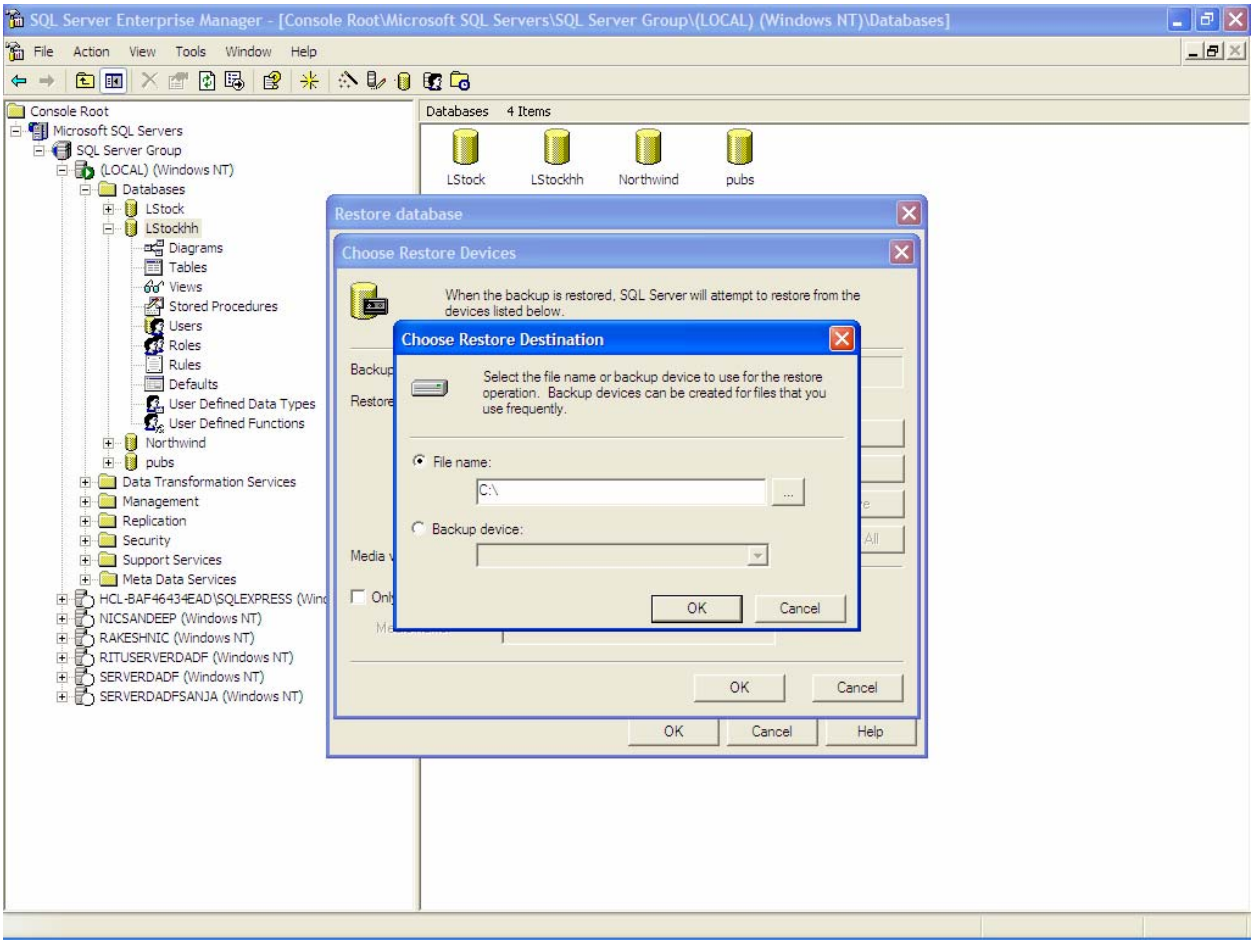
5.10 Click on **From Device** option and then click on **Select devices**



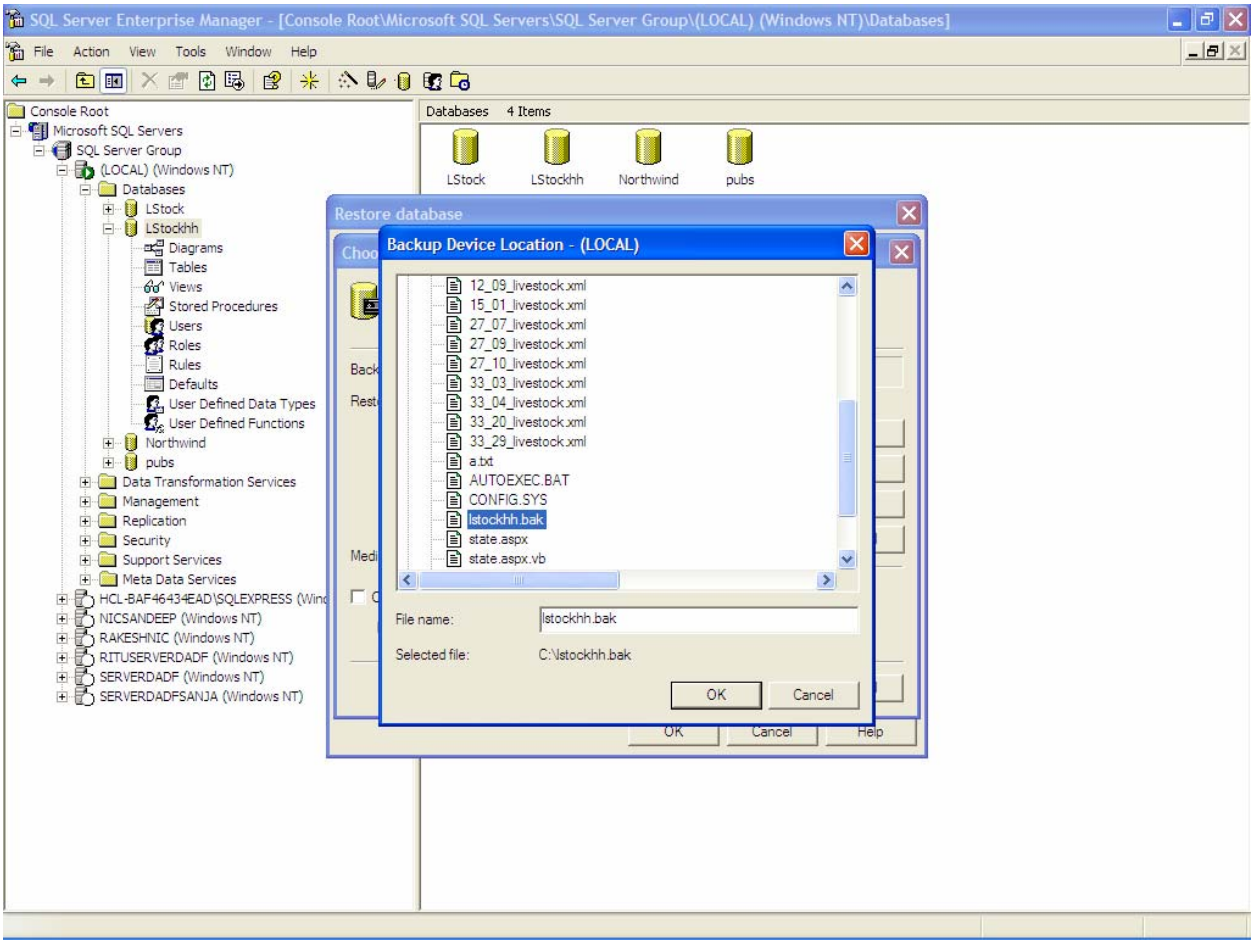
5.11 Click on **Add** option



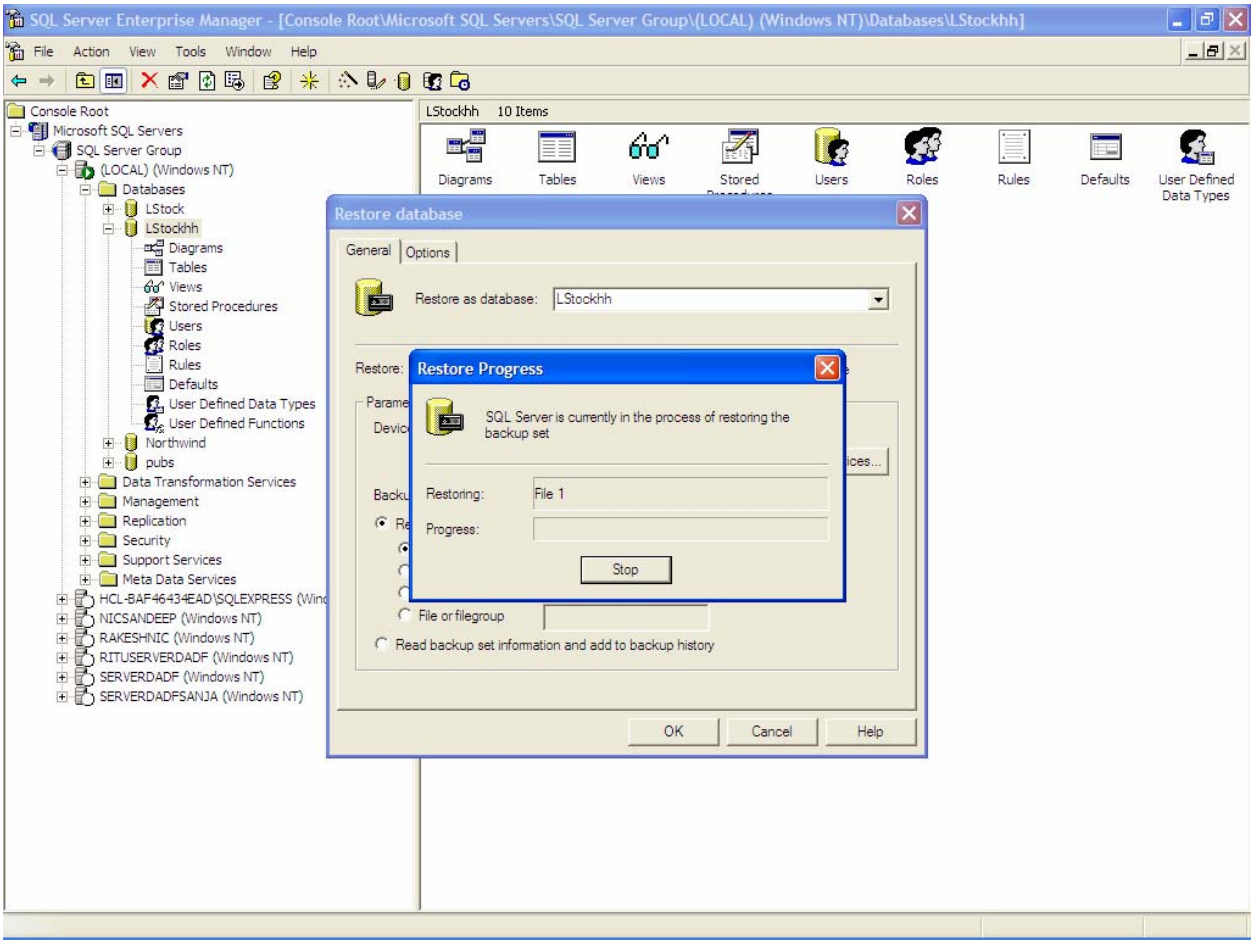
5.12 Click on two dotted buttons **(..)** on the right of **C:**



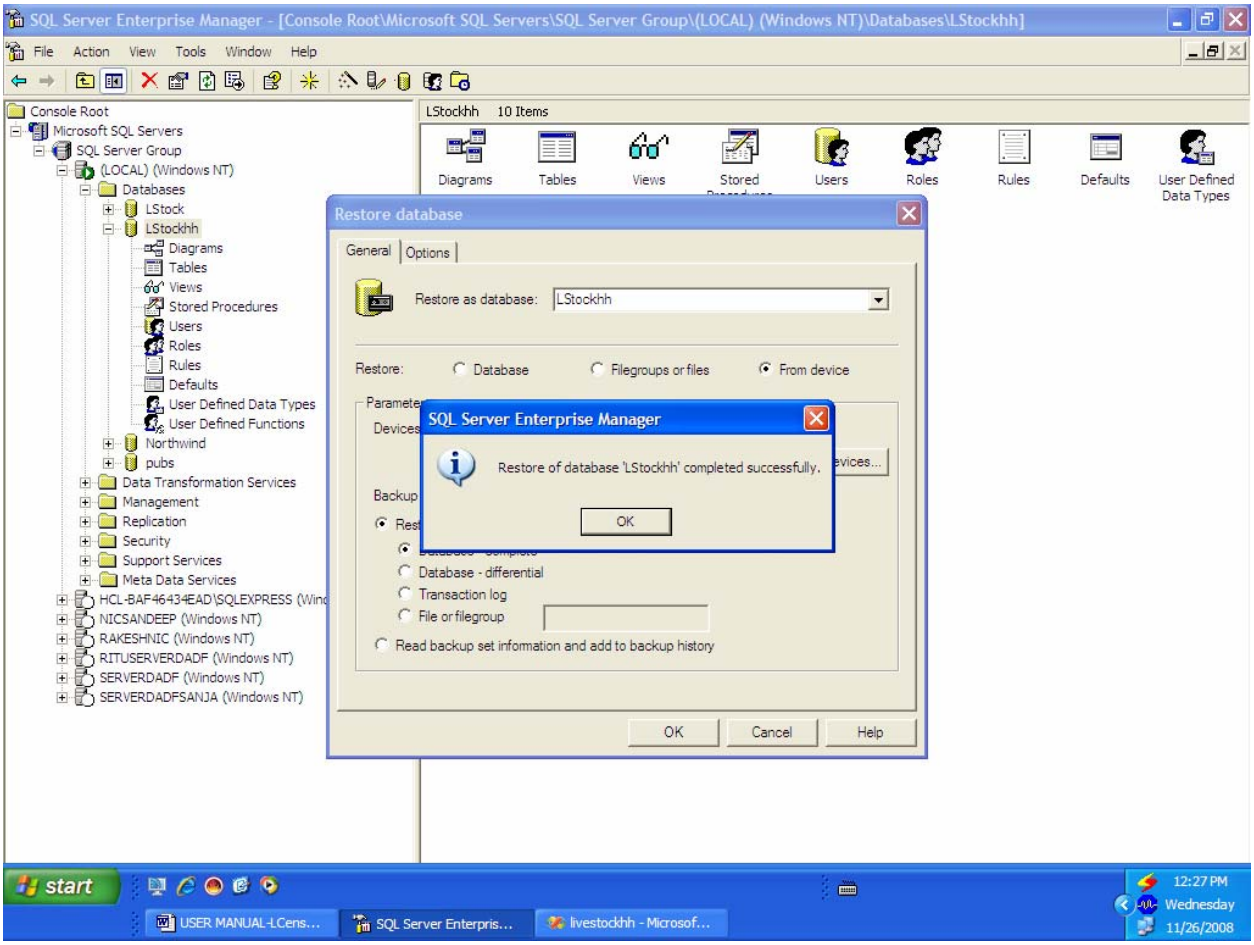
5.13 Then Click on **"lstockhh.bak"** in **C:** after selecting click on **OK** button.(copy "lstockhh.bak" file from CD to C:\ )



5.14 After clicking on **OK** button the following screen will appear (wait)



5.15 Then this message will appear click on ok



6.0 To install or verify the presence of Internet Information Server

Internet Information Server (IIS) is preinstalled on almost all machine and all platforms. It may be verified whether IIS is installed on now IIS on your server machine by clicking on **Start>Settings>Control Panel>Add/Remove Programs** under **Add/Remove Programs,** there is option **Add/Remove Windows Components** on the left side click on this option and follow the steps your IIS will get installed

This step requires Windows XP SP2 installation CD
One may check about IIS to **Start>Settings>Control Panel>Administrative Tools** and presence of **Internet Information Services**

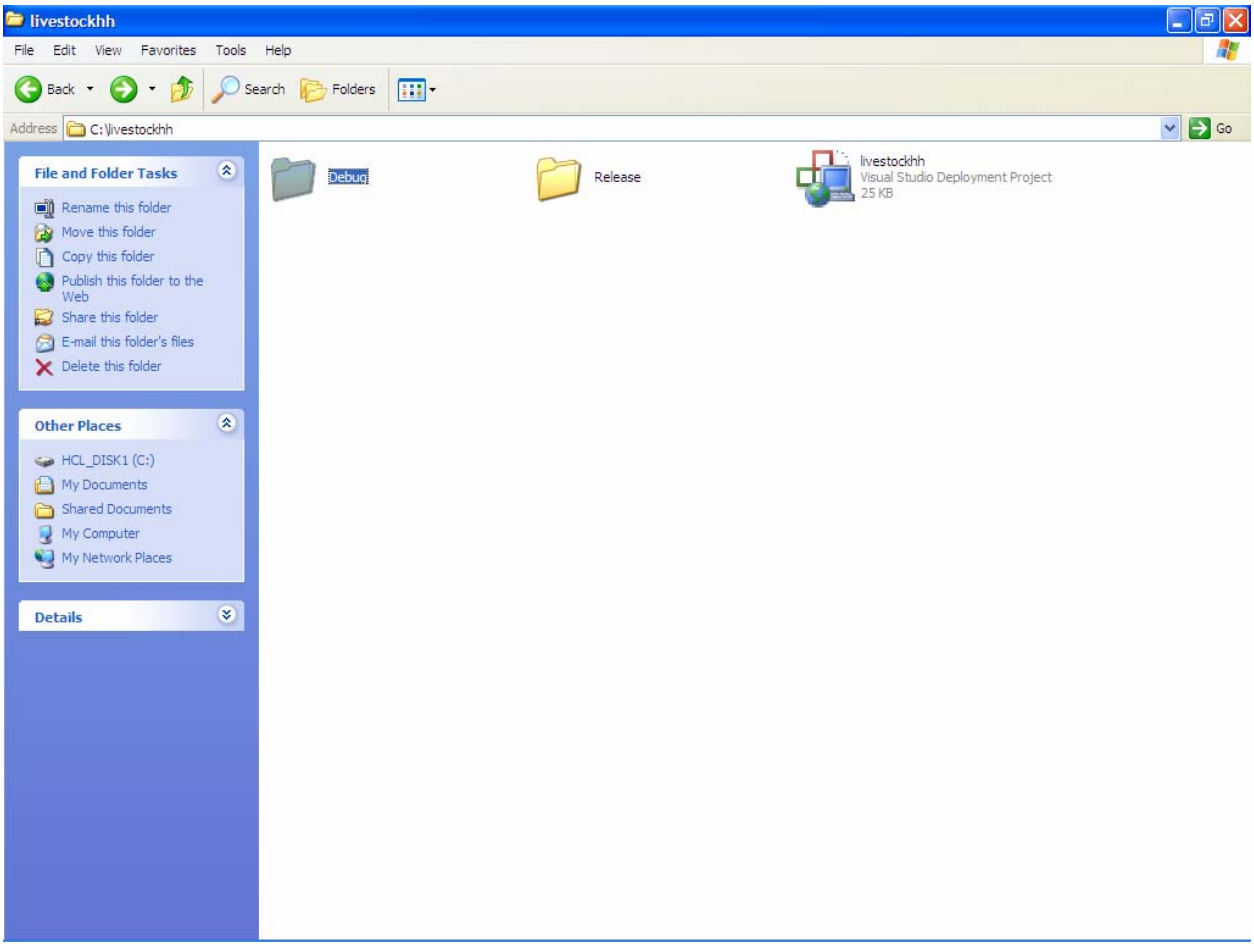
7.0 To Install Detail Data Entry Software for household

After this install , the application software – **Detailed Household Data entry module**. The steps to install the software are as follows:

1. Open CD drive, there is one folder named

Household Software -> "livestockhh" -> then click on "**Debug**" folder

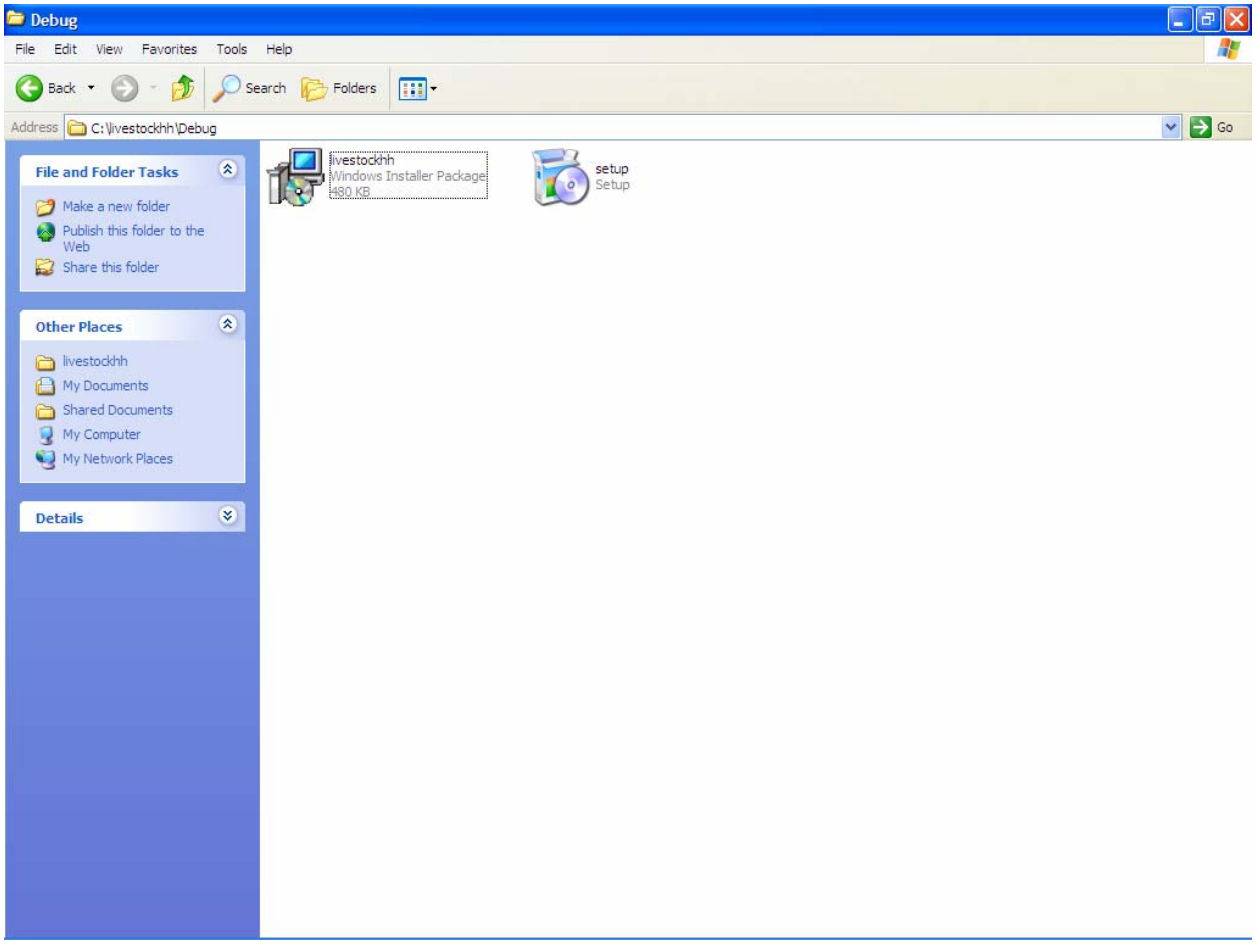


Note :- If you have installed previous version, then kindly uninstall the software first
By Start->Setting->Control Panel ->Add Remove Programs -> Livestockhh

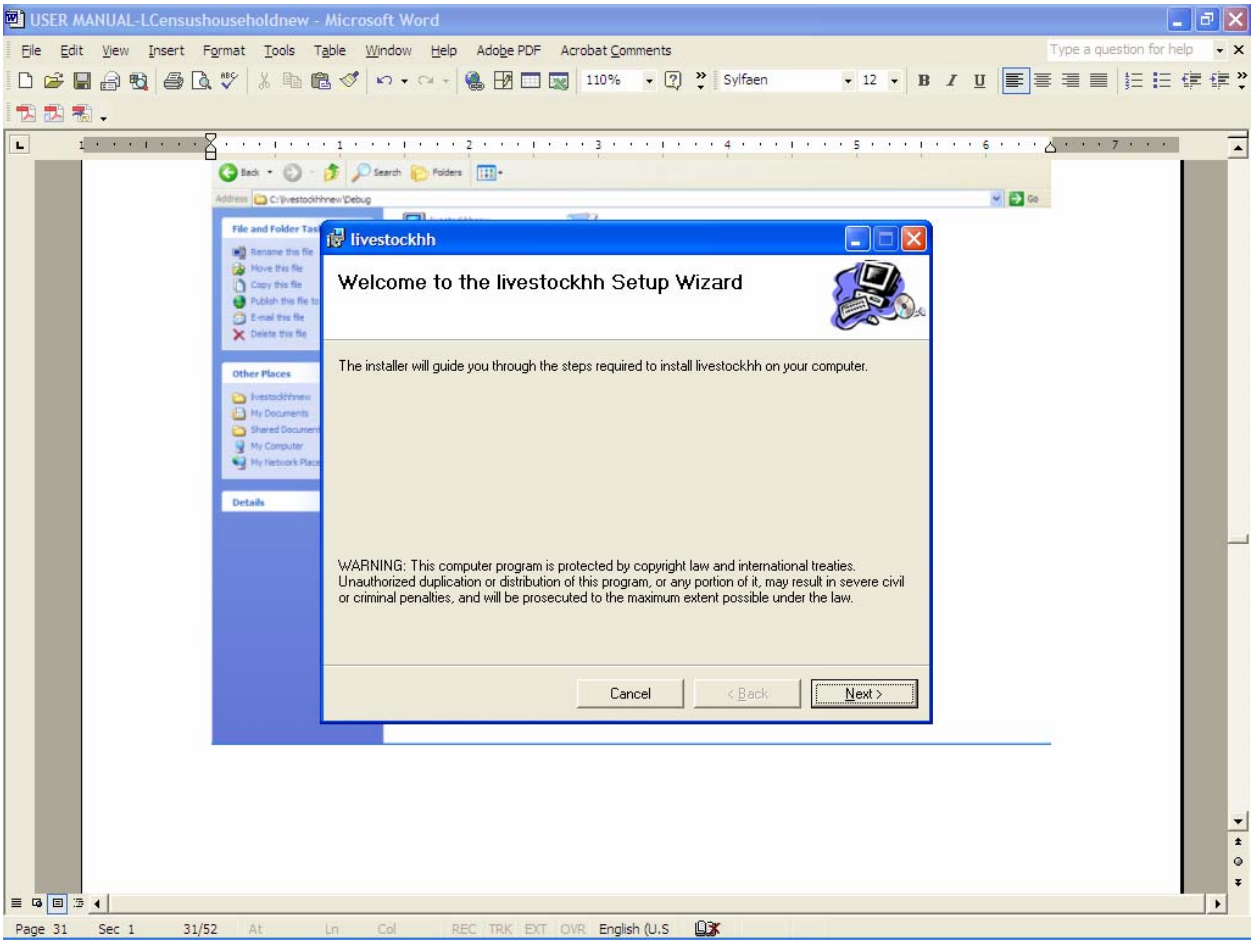
And remove

Start ->Setting -> Control Panel -> Administrative Tools -> IIS -> Web Sites -> Default Web Sites -> Livestockhh

7.1 Click on "**Setup**" icon as shown below



7.2 Following screen appears Click **Next**



USER MANUAL-LCensushouseholdnew - Microsoft Word

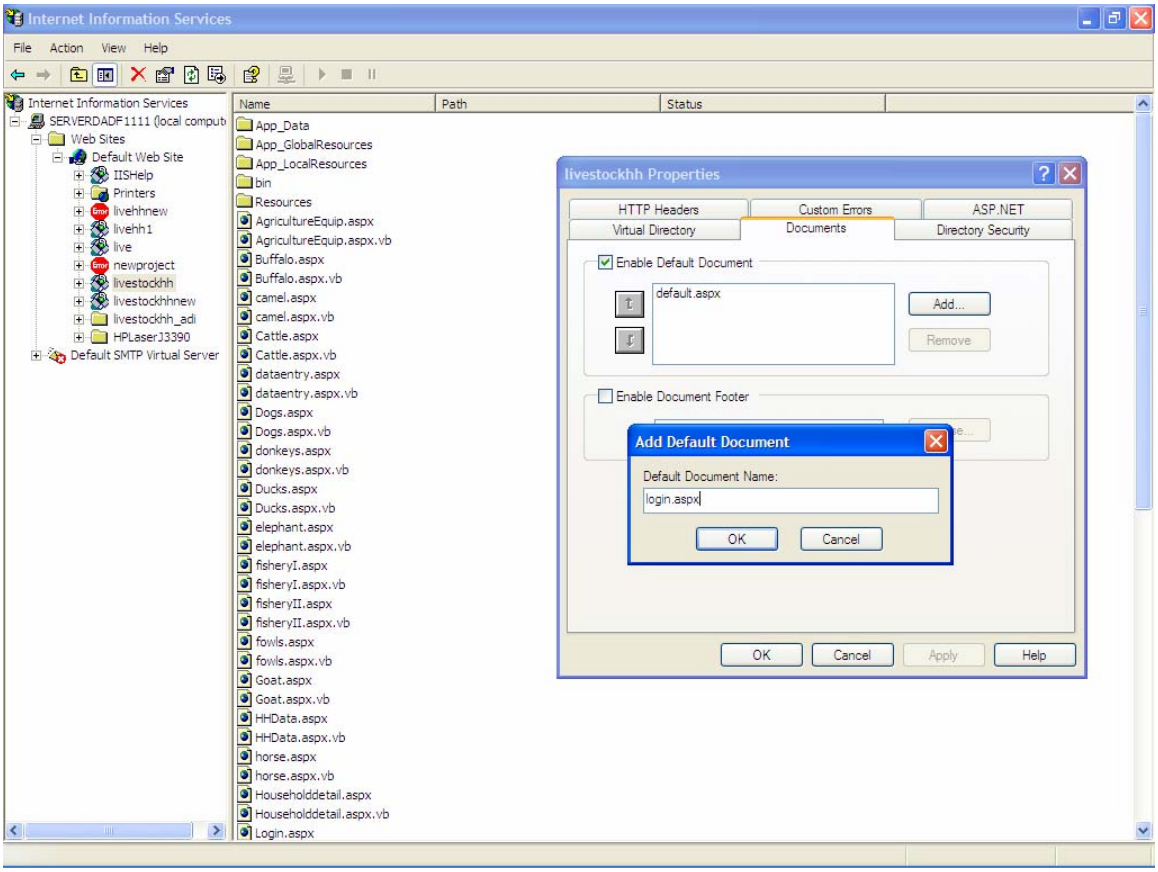
8.0 Configuration of IIS

Start -> Setting -> Control Panel -> Administrative Tools -> IIS -> Web Sites -> Default Web Site ->livestockhh

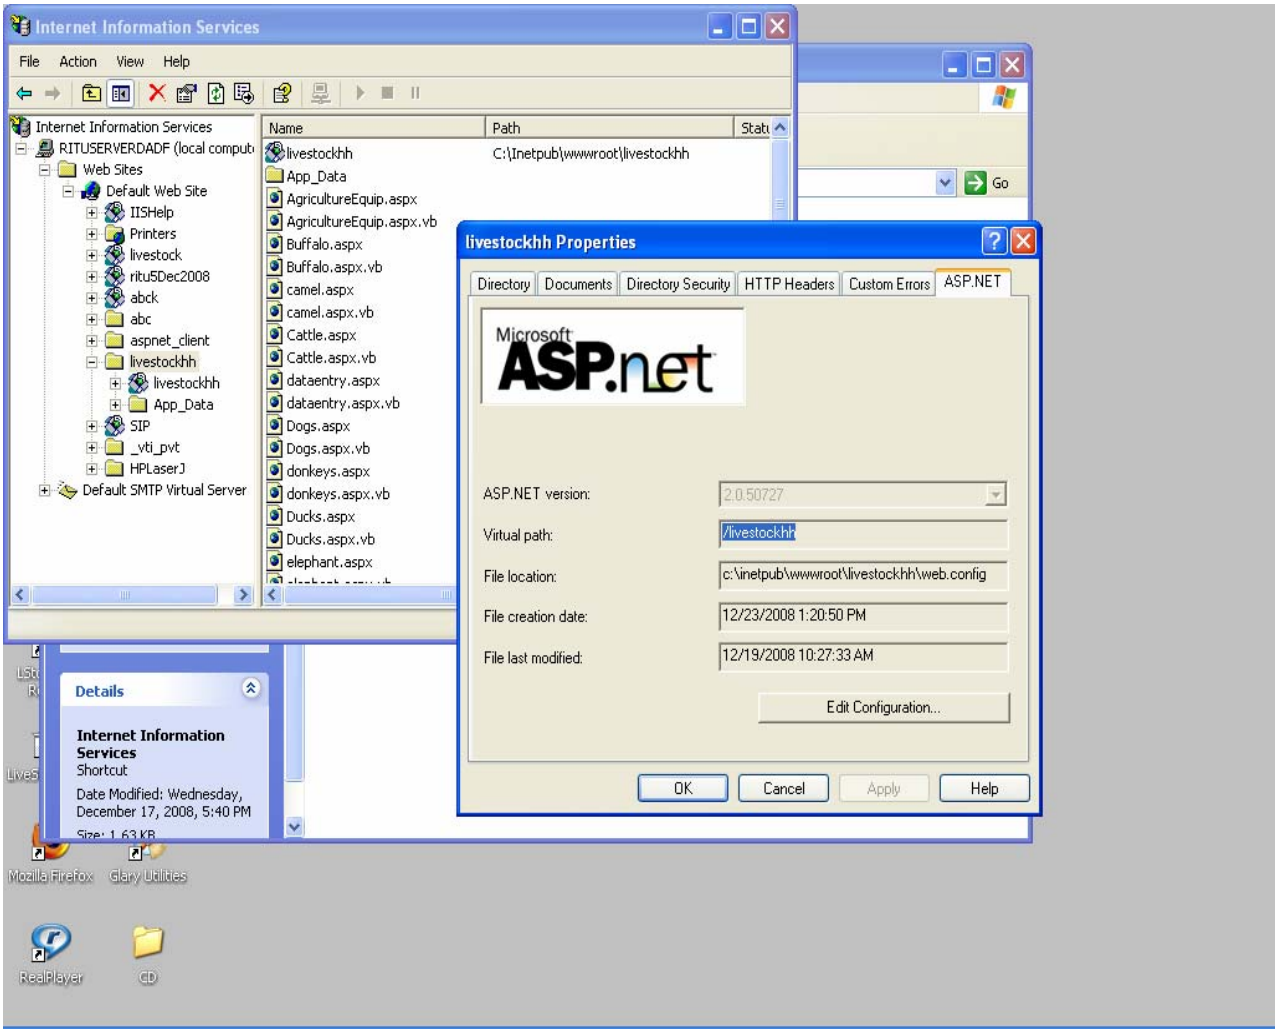
Right Click **livestockhh -> Properties ->Documents -> Add**

Enter **login.aspx** and Click **OK**



8.1 IIS Configuration , Run a program

"%windir%\Microsoft.NET\Framework\v2.0.50727\aspnet_regiis.exe –i
Where %wiindir% is c:\windows in most of the cases , otherwise working directory of windows. Take care of the version.
Also , Start -> Setting -> Control Panel -> Administrative Tools -> WebvSites -> Default Website -> Livestockhh
Right Click Livestockhh -> Properties -> ASP .NET –
If Enabled select the version to v2.0.50727
If Disabled Leave as it is



9.0 How to Use the Software

Open internet explorer . In the address bar type the path **http://serverdadf/livestockhh/login.aspx.** The form shown blow will appear

9.1 Login Form:

- Select your user name.
- Enter your password.

After entering valid username and password the screen below will appear. It is noted that only admin can add new user.

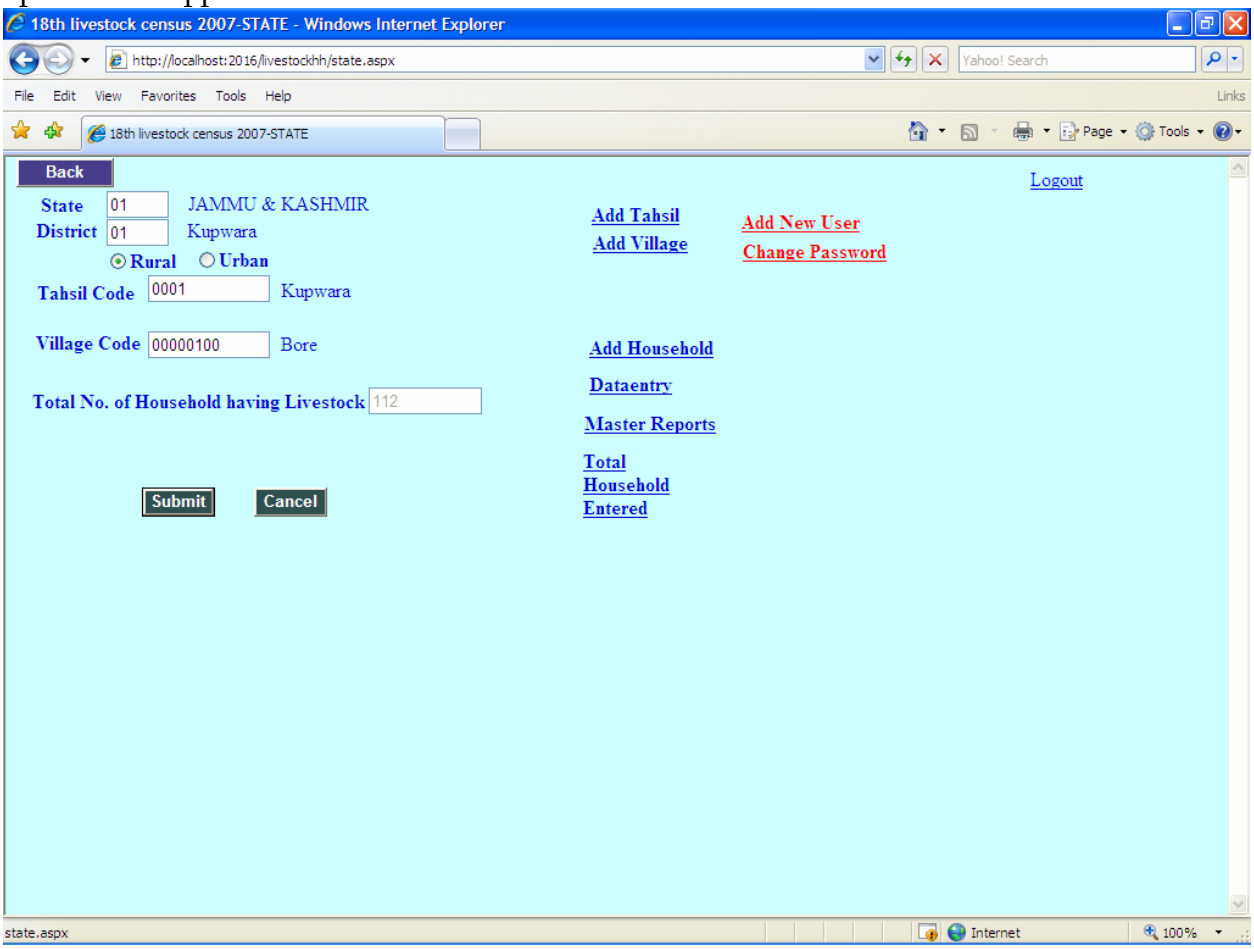
Tahsil and Village can be added only for Rural Category and only by admin user.
Town and Ward can be added only for Urban Category and only by admin user.

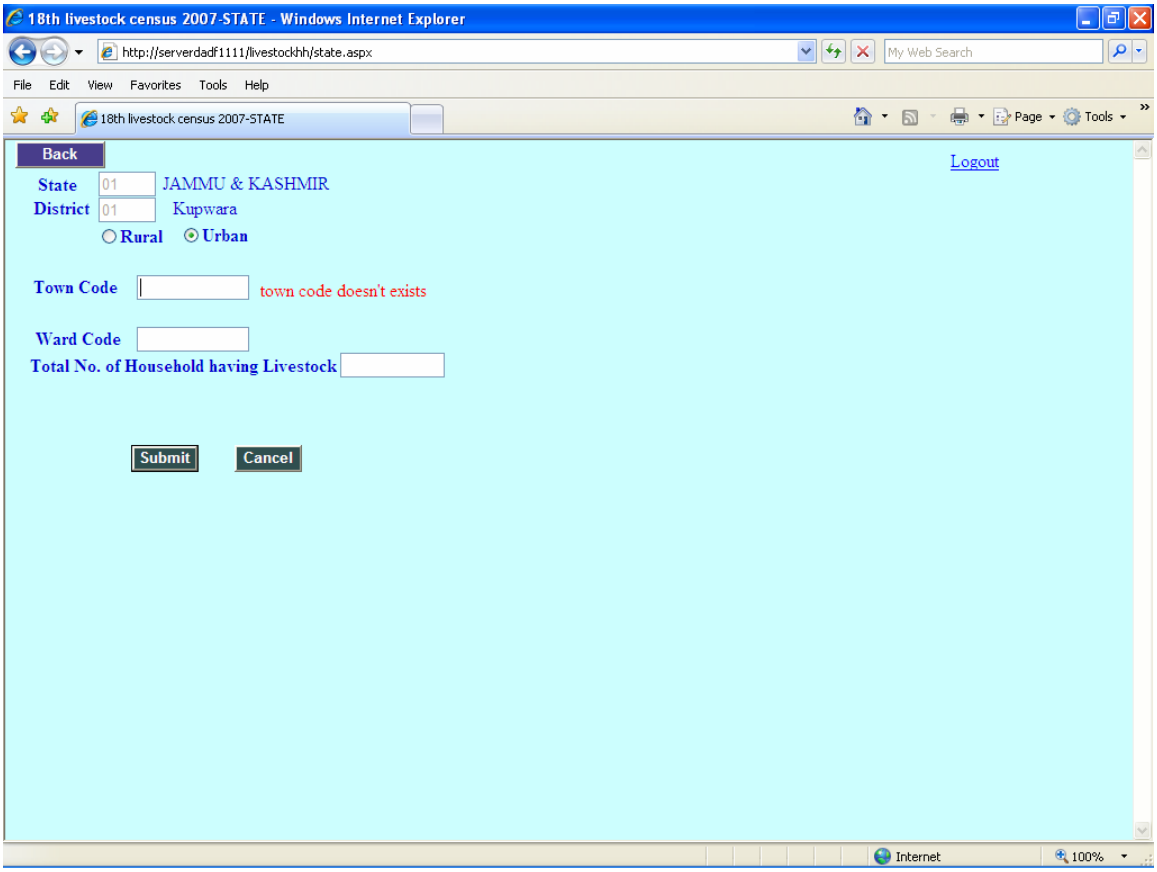
9.2 State Form

- Enter the state code in the corresponding text box.
- Enter district code of the district whose state code is entered. (01 to Number of Districts)
- Select the area type whose data is to be entered (Rural or Urban).
- Enter Tehsil Code and Village Code in Case of Rural or Enter Town Code and Ward code in case of Urban
- Then enter total no. of household having household
- Then Click on submit.

If you login as administrators (admin) add options for village, ward, user and data entry options will appear as follows:



9.3 if you login as a non admin users , the following screen appears (note the absence of Add Tehsil and Add Village ,

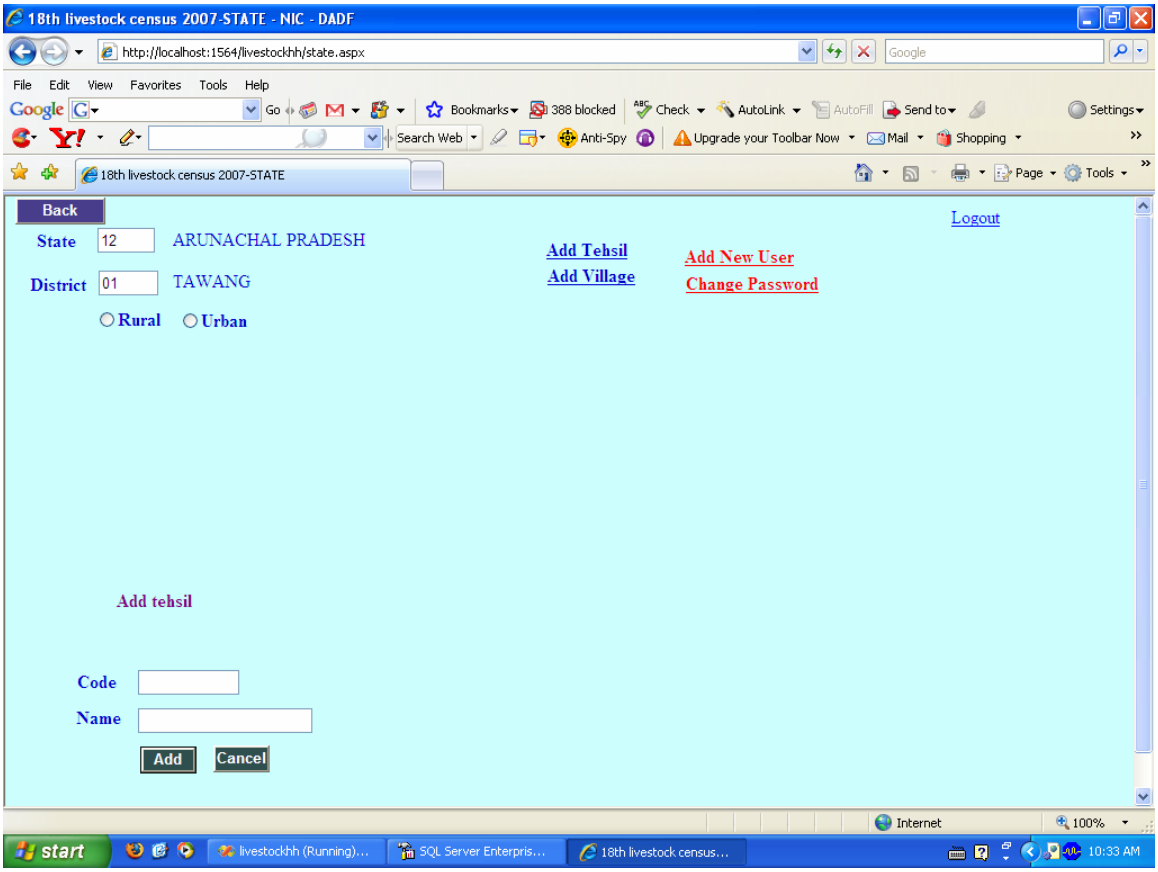


For a smooth data entry, It is advised that

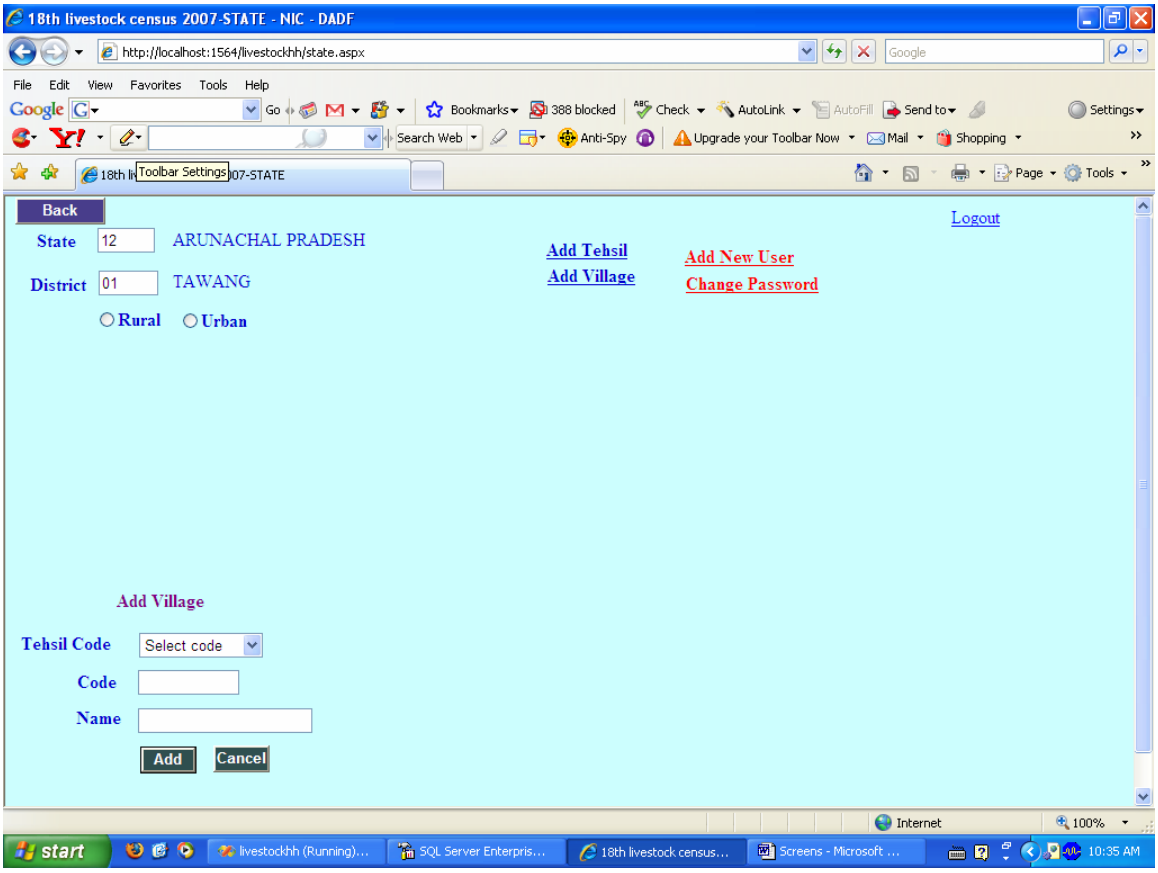
First, district wise user may be added. Data related to one district should not be on different LAN locations or different serverdadf. It can be on different computers on same LAN
Second, finalize the list of Districts.
Third, finalize the list of subdistricts and villages.
Fourth, finalize the list of towns and wards.
No Record can be added or modified in Breed List and State List

A Detailed guideline on ???? is also provided with this Software CD regarding PLCN code of state , District , Subdistrict , towns and wards. It has been observed that village exists without subdistricts and wards exists without town which gives discrepancy in data. Only recoganised breed can be entered. A write up on PLCN Code ???? is also included in the CD

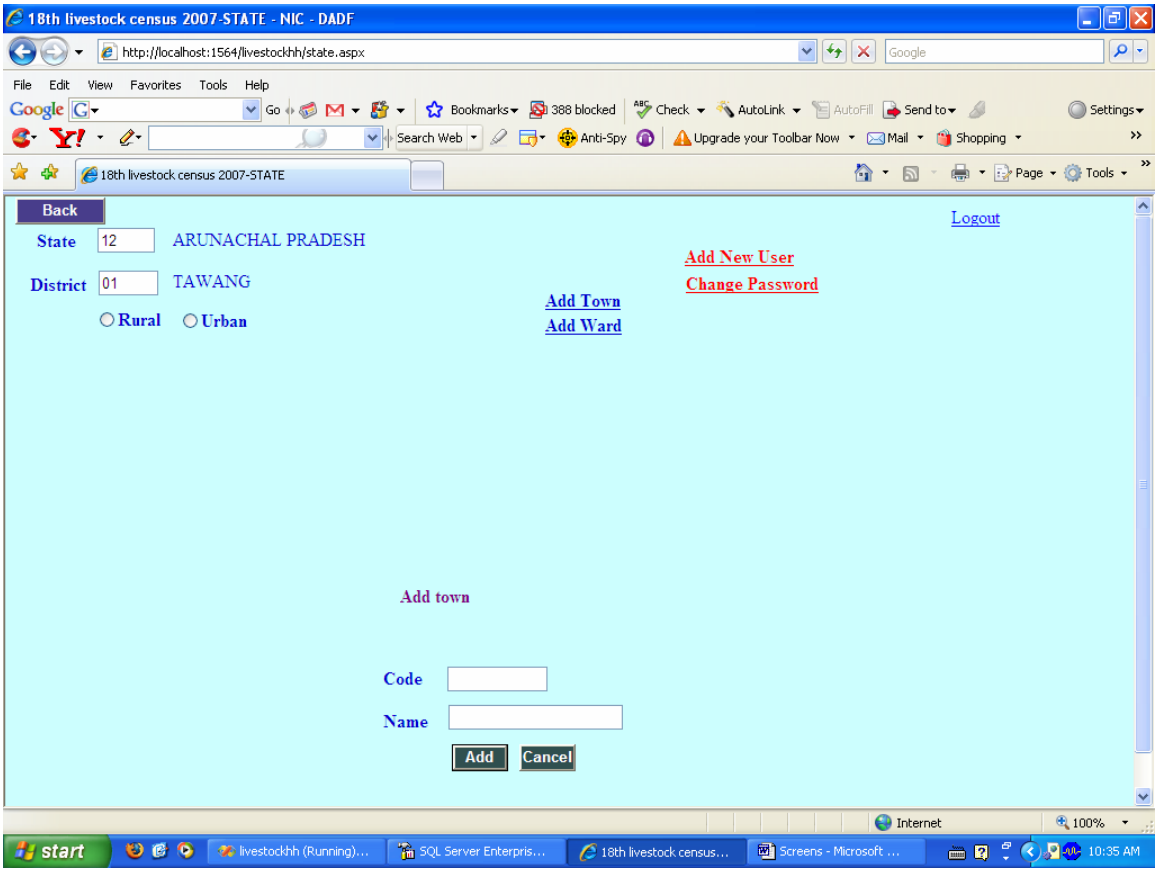
9.3 If your Tahsil is not there you can add Tahsil by clicking on "**Add Tahsil**" option, this facility is for admin user only and available only for **Rural. Add Town and Ward is available to Urban area** type only.



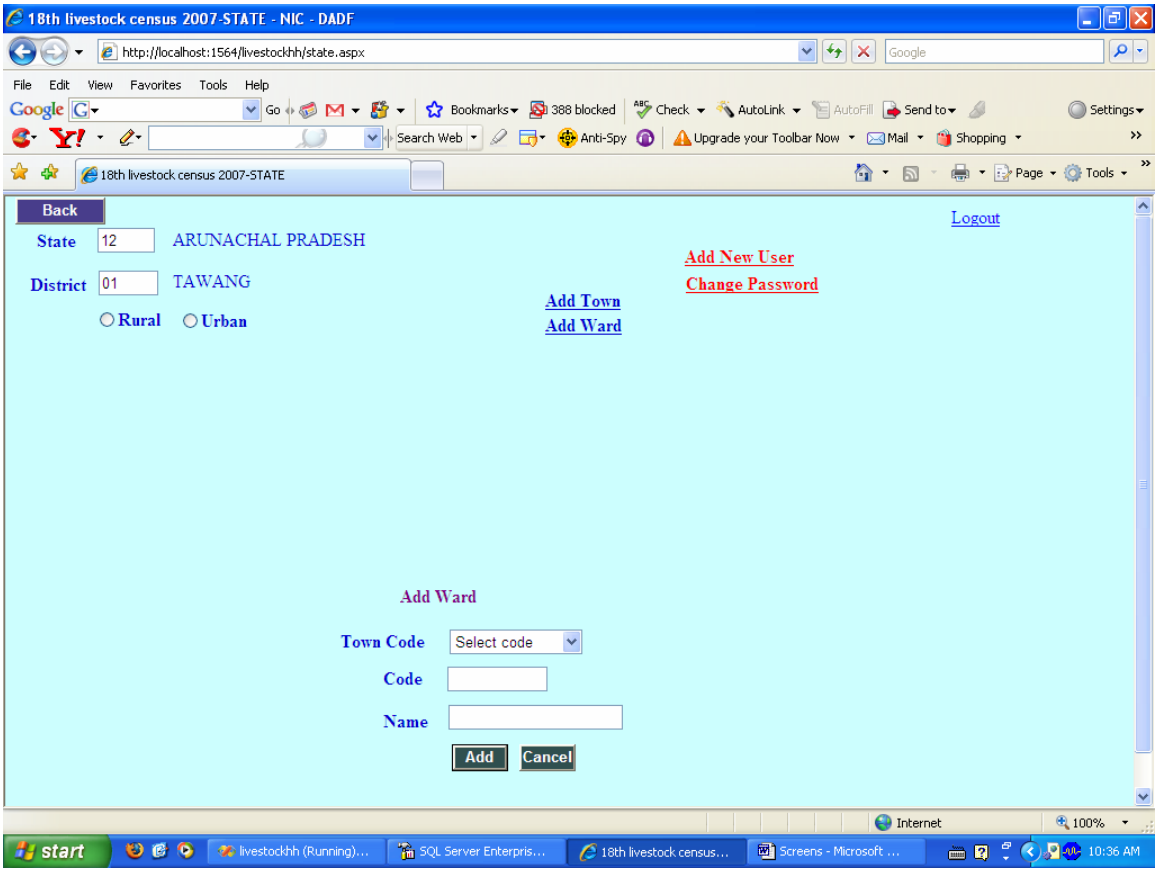
9.4 If your Village is not there you can add Village by clicking on "**Add Village**" option . This facility is for admin user only and can not be entered without Tehsil Code.



9.5 If your Town is not there you can add Town by clicking on "**Add Town**" option (this facility is for admin user only)



9.6 If your ward is not there you can add Ward by clicking on "**Add Ward**" option (this facility is for admin user only)



10.0 House Hold data Entry (Option-I) First click on "**Add Household**" option . The screen shown below will appear for Household. Enter the valid household number and then click on **"Check"** button. **(User has to enter Household first before doing the livestock dataentry. Reason ,if household entry is not there user will not able to do dataentry.**

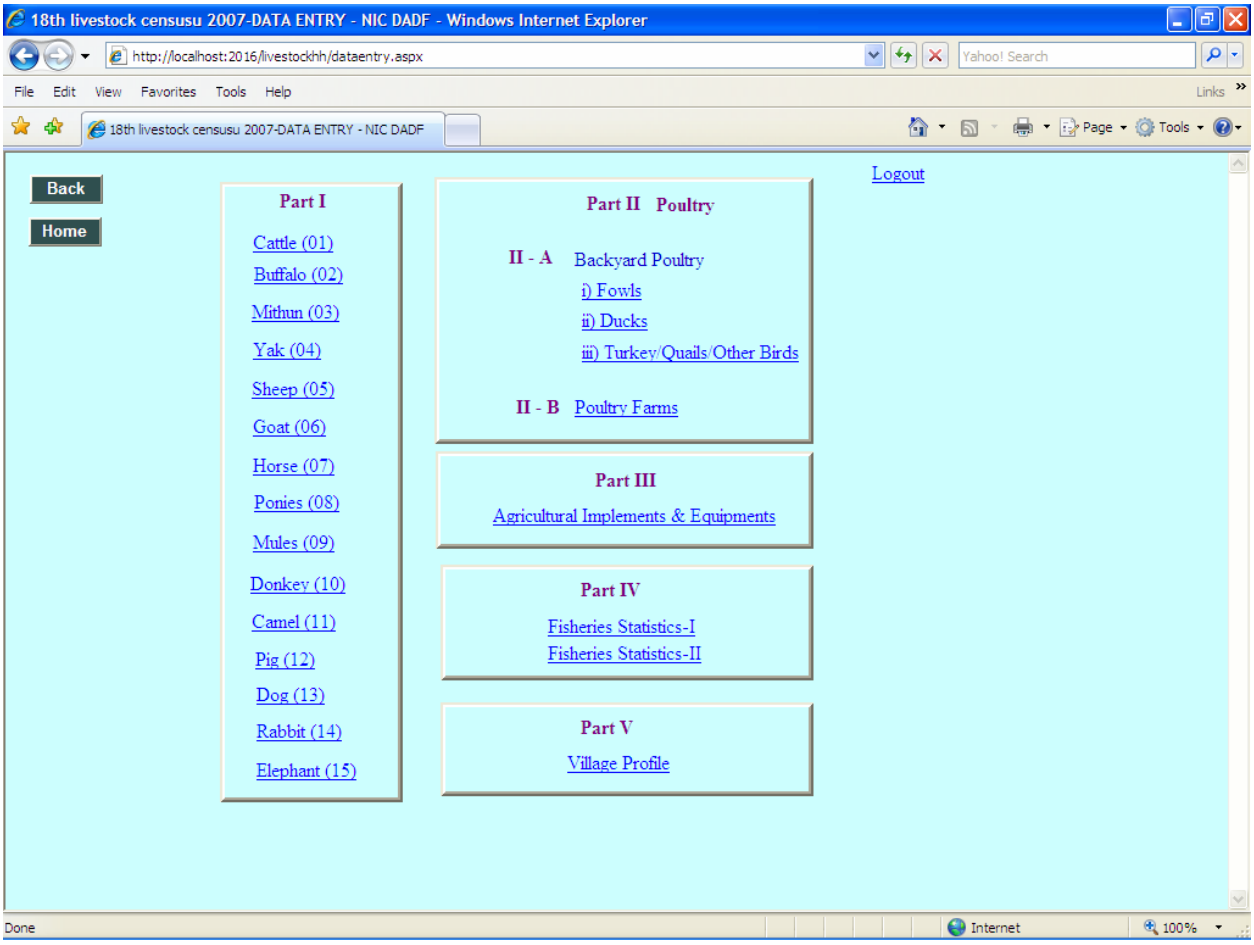
11.0 Data Entry Option -II (Species) Clicking "**Data entry** "following screen will appear. (XML for server only option is for server machine only, it will not appear on client machine. It is for generating and restoring of data from server machine only)



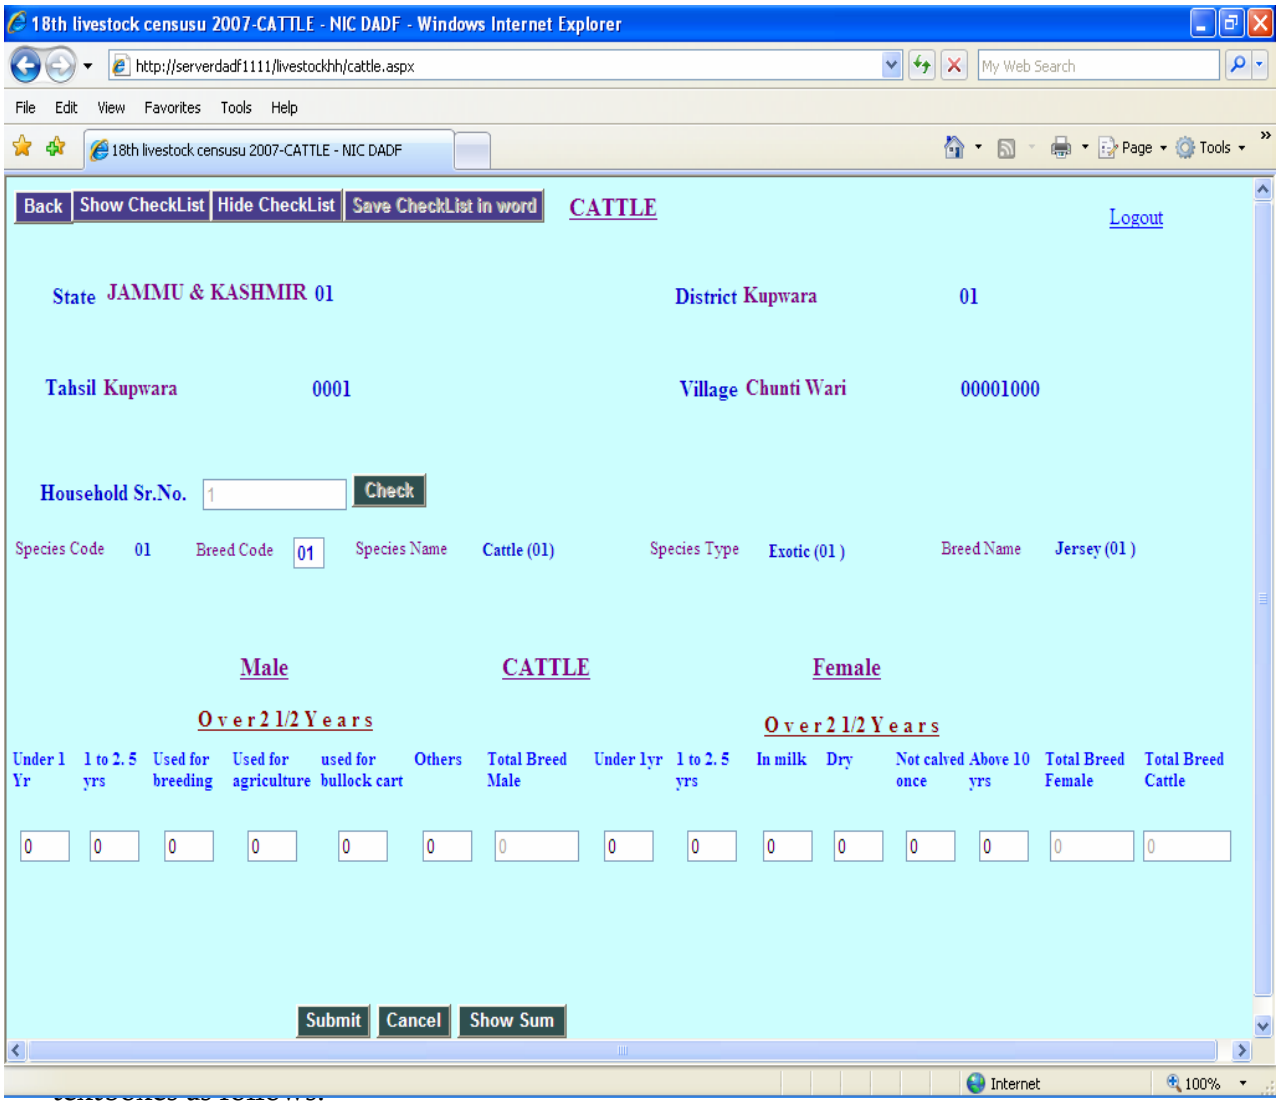
The above Data entry Screen is divided into five Parts

- Part-I contains the 15 Livestock species
- Part-II (A) contains Backyard Poultry(Fowls, Ducks, Turkey/Quails/Other birds)
- Part-II (B) contains Poultry Farms
- Part-III Agricultural Implements & Equipments
- Part-IV Fisheries Statistics-I and Fisheries Statistics-II
- Part V Village Profile

11.1 **Data Entry Livestock :-** By clicking on each link the respective screen will appear. For example: on Clicking "Cattle specie", the Cattle screen will appear as shown below. The cursor will blink in "Household Sr No. text box" enter the household number and then click on **Check** button to verify whether data exists for cattle in the village or ward.

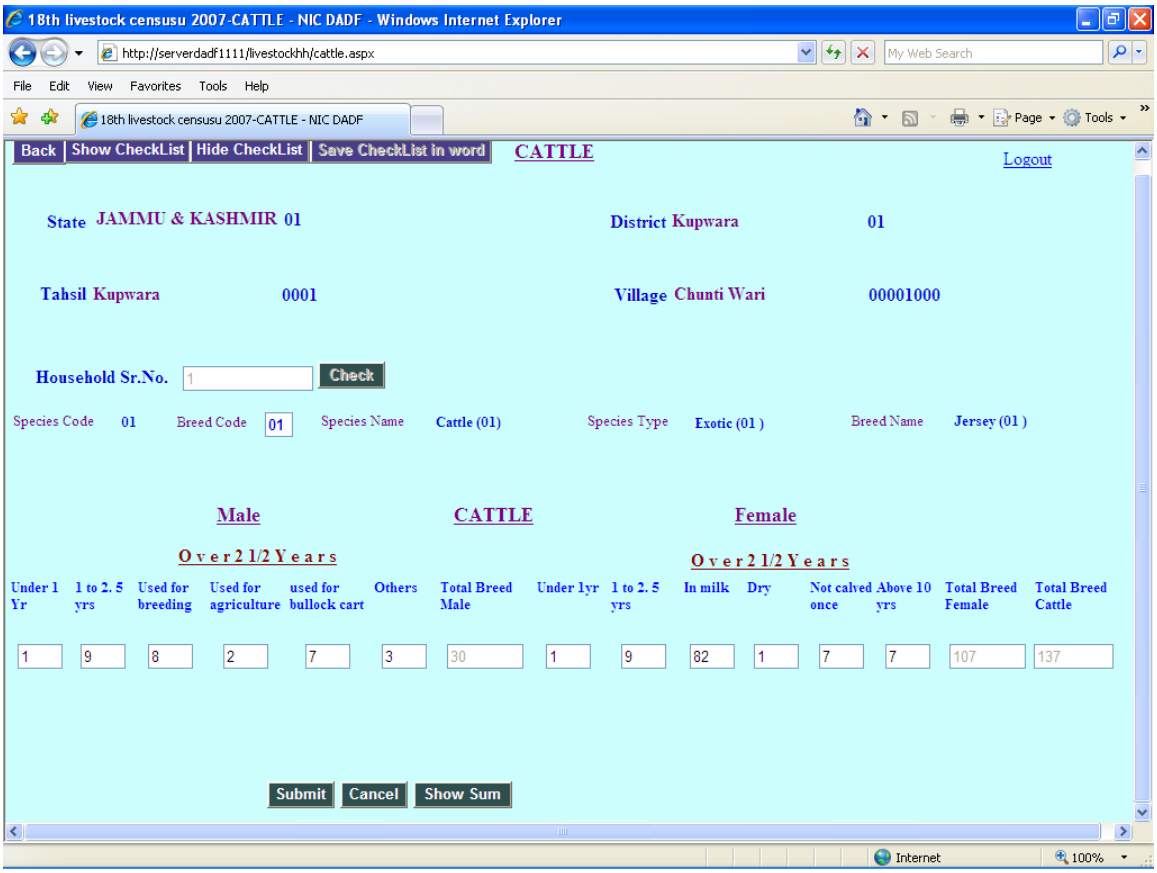
11.2 If the household number is correct, the screen below will appear and if the household number is incorrect the message" Household number does not exist will appear"

- After entering the correct species and breed code textboxes for entering data will appear on the screen.
- As soon as the user enters data, to see the sum , click **Show Sum** Button to verify the sum displayed in the textbox with heading total.
- If user enters data in incorrect format a message ' Enter correct value' will flash.
- After entering data click submit. Data will be saved in the database and a message "Data Entered." will appear.



11.3 If the record already exists for any breed, the data, already entered , will be shown in the respective textboxes as follows:

- Button for update and delete will appear.
- If user wants to change the data he can correct it and then press "Update" the changes will be saved in the database.
- To delete the record click on "Delete" button.
- To cancel the selection press "Cancel" button. Textbox for data editing will disappear.
- To see the total of Male and Female breed click Sow sum option
- Back Button is used to go back to previous screen
- Home Button is used to go to Login screen
- Logout is used to close the application



Similarly, you can enter the data for other species.

11.4 By clicking on "ShowCheckList" option on the top you can see the list of data entered for a particular village or ward , and for particular species (all breed). Hide checklist button is to hide the checklist for proper viewing. If problem comes then verify Auto Hide option.

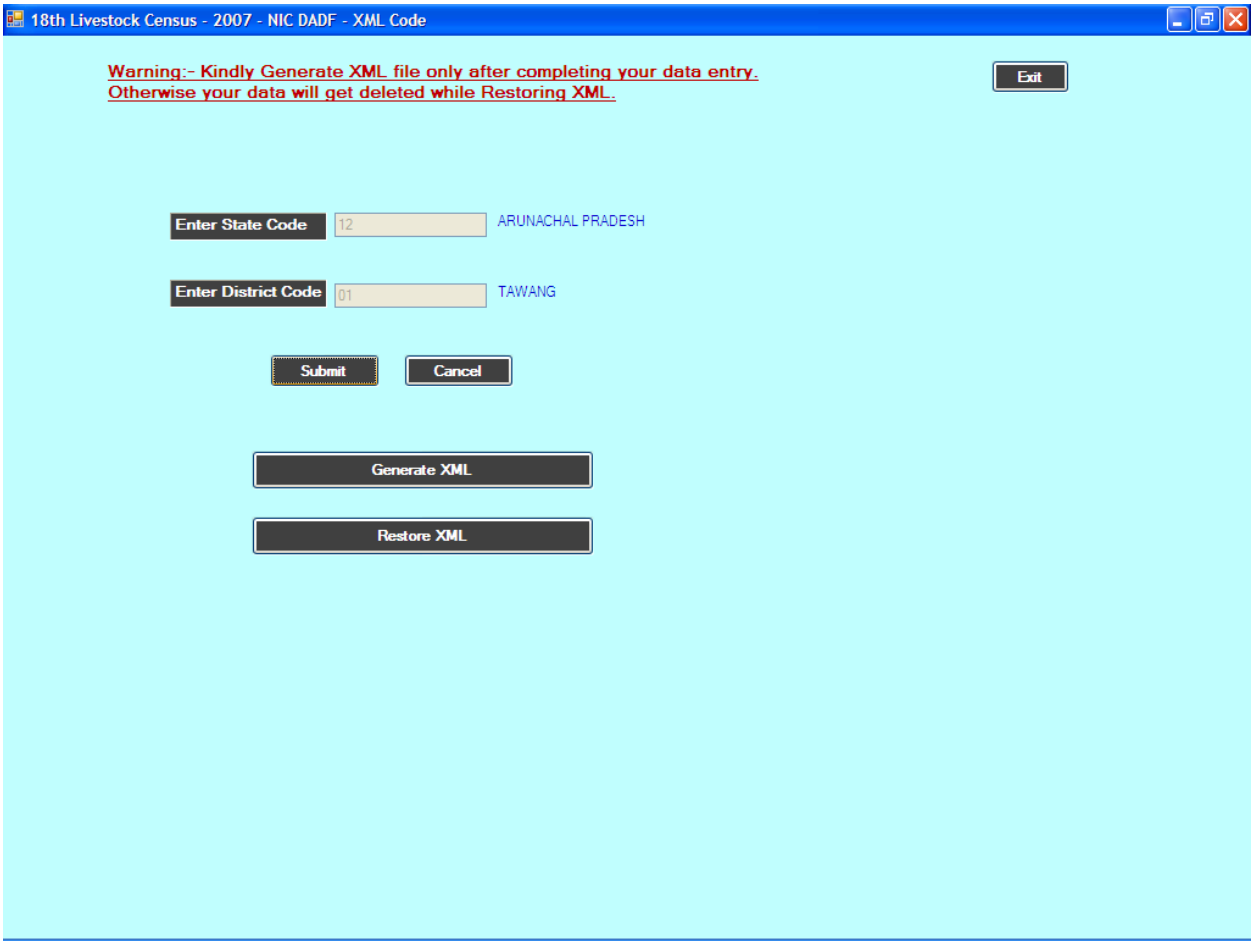
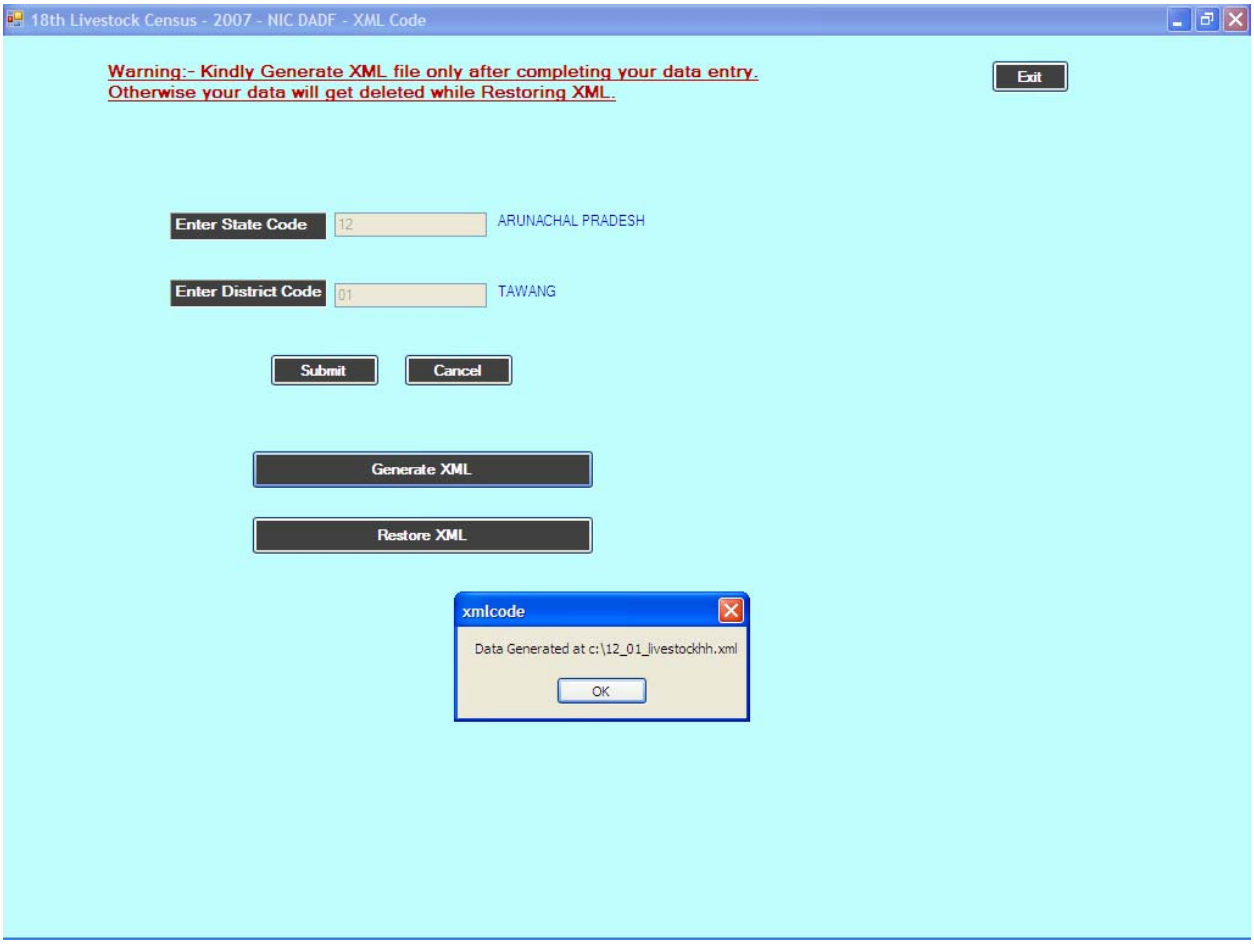
16. 0 Data Transmission, Backup and Restore: (Note:- this setup is to be installed on serverdadf named machine only.)

For data transmission there is setup in the CD with the name XMLsetup in the folder XML SW. Click on Folder XML>then Click on Debug Folder>then click on Setup. Follow the instruction for installing. After following the instructions for installation the icon will appear on the desktop as well as in Programs.

Data is to be sent only complete district wise. This option may only be used to transport data and taking backup. The data thus generated may also be ported to other system by option using **Restore XML** . This option is available only for server or computer named serverdadf. It is advised that periodically district wise xml file should be generated backup purpose after entering record.

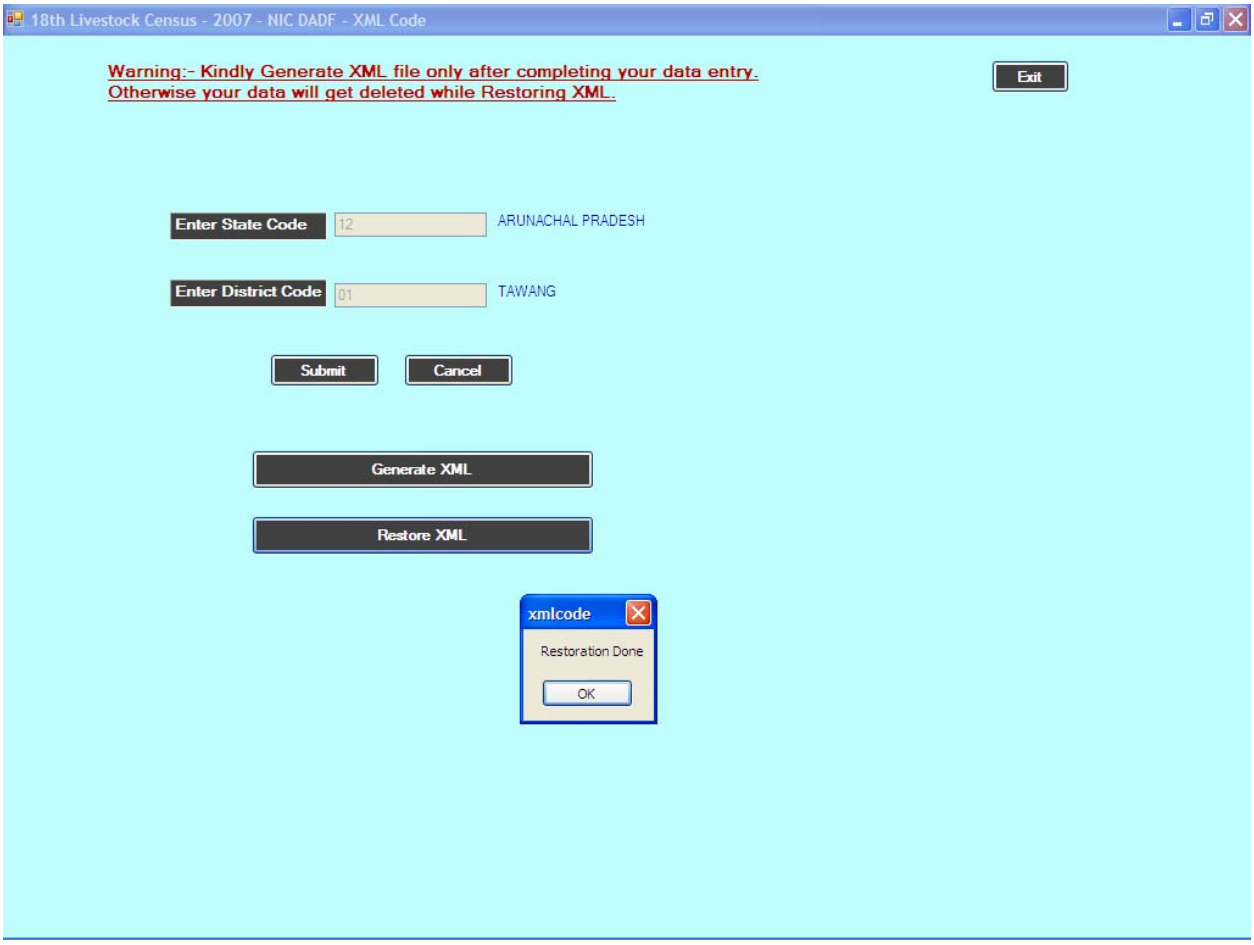


16.1 Generate XML :- After clicking on **XML Button, on your desktop** the following screen will appear



By clicking on Generate XML file
A file with name (state code_dist code_livestock.xml) will be generated in c:\.
The name of the file will be displayed in a message box.
Click on "OK", the file will be generated.

16.2 Restore XML: - After clicking on **XML Button,** the following screen will appear.



Attach the file as an attachment to your mail and send it to the concerned authority and sanjay15@nic.in
